

ECONOMICS MARK SCHEME GENERAL TEMPLATE.

8 MARK SCHEME

8 mark question- Examine • KAAE- 2 marks for each, so write 2 KAA paragraphs with evaluation • Identify two factors/reasons and use definitions • Use data from the extract to back up points • Use chains of analysis to explain • Use a diagram if possible • State two evaluation points or explain one more thorough point

10 MARK SCHEME

10 mark question- Assess

• KAA- 6 and 4 • Requires deeper evaluation than in the 8 marker, use 2 more thorough pieces of evaluation and application can help to evaluate • This is the first question marked by levels shown below:

You can either do 2 brief points, or one indepth point which will sufficiently get you through the levels. Try to ensure evaluation is not on the brief side. A safe approach to this would be to evaluate each reason separately.

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no link between causes and consequences.
Level 2	3–4	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or the answer may lack balance.
Level 3	5–6	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are applied appropriately to the broad elements of the question.

Evaluation

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/ reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

The Routledge Handbook of the Economics of Education Brian P. McCall,2021-12-30 The economics of education is a burgeoning area of study employing increasingly sophisticated analytical tools to answer questions with high societal impact Thus the aim of this handbook is to provide readers with an up to date overview of the current state of the field of the economics of education and its main areas of research This comprehensive handbook provides an authoritative overview of key theoretical and policy areas covering topics like econometric methods for education economics returns to education competition in education provision education and economic growth and education and inequality It reviews the current state of research from early childhood through postgraduate education as well as adult education and life long learning Offering a truly international perspective the handbook benefits from a global group of contributors and attention to both developed and developing country contexts The Routledge Handbook of the Economics of Education will be a valuable resource for advanced students researchers and policymakers across economics education and public policy *The Political Economy of Electricity* Mark Cooper,2017-04-24 Providing critical insights that will interest readers ranging from economists to environmentalists policymakers and politicians this book analyzes the economics and technology trends involved in the dilemma of decarbonization and addresses why aggressive policy is required in a capitalist political economy to create a sea change away from fossil fuels The environmental damage across the globe is a result of the success of capitalist industrialism

250 years of carbon pollution resulting from consumption of fossil fuels to drive the economy and the worldwide aspiration to ever increasing levels of economic development But capitalism has also produced the tools to solve the problems it has created in the form of a technological revolution in low carbon renewables distributed resources and intelligent systems to integrate supply and demand This book comprehensively examines the political economy of electricity and analyzes the challenge of transforming today s electricity sector to meet the dual goals of decarbonization and development expressed in the Paris Agreement Author Mark Cooper defines the dilemma of development and decarbonization as the great challenge facing the electricity industry and documents how the economic resources costs of a 100 percent renewable portfolio has declined to the point that decarbonization can pay for itself making the low carbon renewable technologies that enable desired environmental and public health benefits an easy sell He identifies the substantial benefit of increasing use of information communications and advanced control technologies shows how targeted innovation could speed the transition by a decade or two and lower the overall cost of the transition by as much as half and explains why the flexible multi stakeholder approach of the Paris Agreement is the correct approach

[Handbook of Analytical Studies in Islamic Finance and Economics](#) Zamir Iqbal,Tarik Akin,Nabil El Maghrebi,Abbas Mirakhor,2020-08-10 This handbook offers a unique and original collection of analytical studies in Islamic economics and finance and constitutes a humble addition to the literature on new economic thinking and global finance The growing risks stemming from higher debt slower growth and limited room for policy maneuver raise concerns about the ability and propensity of modern economies to find effective solutions to chronic problems It is important to understand the structural roots of inherent imbalance persistence in error patterns policy and governance failures as well as moral and ethical failures Admittedly finance and economics have their own failures with abstract theory bearing little relation with the real economy uncertainties and vicissitudes of economic life Economic research has certainly become more empirical despite or perhaps because of the lack of guidance from theory The analytics of Islamic economics and finance may not differ from standard frameworks methods and techniques used in conventional economics but may offer new perspectives on the making of financial crises nature of credit cycles roots of financial system instability and determinants of income disparities The focus is placed on the logical coherence of Islamic economics and finance properties of Islamic capital markets workings of Islamic banking pricing of Islamic financial instruments and limits of debt financing fiscal stimulus and conventional monetary policies inter alia Readers with investment regulatory and academic interests will find the body of analytical evidence to span many areas of economic inquiry refuting thereby the false argument that given its religious tenets Islamic economics is intrinsically narrative descriptive and not amenable to testable implications Thus the handbook may contribute

toward a redefinition of a dismal science in search for an elusive balance between rationality ethics and morality and toward a remodeling of economies based on risk sharing and prosperity for all humanity

The Economics of Quality, Grades and Brands (Routledge Revivals) Peter Bowbrick, 2014-08-01 Virtually every decision to produce buy or sell is influenced by quality yet until this book was first published in 1992 there had been very little attempt to produce a comprehensive and practical theory for this Here Peter Bowbrick brings together different traditions of quality analysis from economics marketing economics and marketing itself to identify the limitations of the different traditions of quality economics and some approaches to its analysis Beginning with a definition of the subject and the concepts involved this comprehensive title will be of particular value to students of Economics Marketing and Business Studies

Constitutions of Value Isabel Feichtner, Geoff Gordon, 2023-01-19 Gathering an interdisciplinary range of cutting edge scholars this book addresses legal constitutions of value Global value production and transnational value practices that rely on exploitation and extraction have left us with toxic commons and a damaged planet Against this situation the book examines law s fundamental role in institutions of value production and valuation Utilizing pathbreaking theoretical approaches it problematizes mainstream efforts to redeem institutions of value production by recoupling them with progressive values Aiming beyond radical critique the book opens up the possibility of imagining and enacting new and different value practices This wide ranging and accessible book will appeal to international lawyers socio legal scholars those working at the intersections of law and economy and others in politics economics environmental studies and elsewhere who are concerned with rethinking our current ideas of what has value what does not and whether and how value may be revalued The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
