The econocracy Joe Earle, Cahal Moran, Zach Ward-Perkins, 2016-11-03 One hundred years ago the idea of the economy didn't exist. Now improving the economy has come to be seen as perhaps the most important task facing modern societies. Politics and policymaking are conducted in the language of economics and economic logic shapes how political issues are thought about and addressed. The result is that the majority of citizens who cannot speak this language are locked out of politics while political decisions are increasingly devolved to experts. The econocracy explains how economics came to be seen this way and the damaging consequences. It opens up the discipline and demonstrates its inner workings to the wider public so that the task of reclaiming democracy can begin.

Cooperative Internet Computing Alvin T. S. Chan, Stephen Chan, Hong Va Leong, Vincent Ng, 2003-03-31 The Second International Workshop on Cooperative Internet Computing CIC2002 has brought together researchers, academics and industry practitioners who are involved and interested in the development of advanced and emerging cooperative computing technologies. Cooperative computing is an important computing paradigm to enable different parties to work together towards a pre-defined non-trivial goal. It encompasses important technological areas like computer-supported cooperative work, workflow, computer-assisted design and concurrent programming. As technologies continue to advance and evolve, there is an increasing need to research and develop new classes of middlewares and applications to leverage on the combined benefits of Internet and web to provide users and programmers with highly interactive and robust cooperative computing environments. It is the aim of this forum to promote close interactions and exchange of ideas among researchers, academics and practitioners on the state-of-the-art researches in all of these exciting areas. We have partnered with Kluwer Academic Press this year to bring to you a book compilation of the papers that were presented at the CIC2002 workshop. The importance of the research area is reflected both in the quality and quantity of the submitted papers where each paper was reviewed by at least three PC members. As a result, we were able to only accept 14 papers for full presentation at the workshop while having to reject several excellent papers due to the limitations of the program schedule.

Those wishing to increase their understanding and appreciation of wine for personal enjoyment or social know-how, and those who desire to pursue or advance a professional career in the wine industry, now confront a plethora of wine education options with a confusing array of titles, degrees, certificates, and specializations. Some wine education is free and short, while other programs can cost dearly in time and money. Some courses of study take a few hours, and others a few years. Institutions offering wine education vary from state colleges and universities to non-profit organizations and many profit-seeking companies. Sommeliers require training that may be mostly useless to vintners. Someone who wants to deftly handle ordering wine in a restaurant probably doesn't want to learn about wine chemistry or Integrated Pest Management. Which program is right for you? What's the difference between an MS and an MW or an MS in viticulture? Is the education for a CWE the same as that for a WSET Diploma? Are some schools better for learning about wine journalism than the wine business? This book will help answer such questions. There are chapters on wine studies programs and credentials including for sommeliers and those working in the wine trade, university viticulture and enology programs, wine business study programs, free online wine education courses, wine studies scholarships, and wine mentorship programs. Advance Praise for Leary's Global Wineology: This groundbreaking book on wine education will be useful to business owners as well as wine enthusiasts. When I bought my wine business, I looked far and wide for guidance on classes or programs to strengthen my wine knowledge. Nothing existed. It was an arduous task to figure out which course to take amongst the so many offered. Charlie Leary has now filled that gap. It will be useful to me not only in assessing candidates for employment but also as a resource in training my staff. This guide is indispensable for anyone in the wine trade, write large, and has lots of information of use to the general wine drinking public.
