creating a unified field the disciplines devalued social studies and thus any discipline associated with it The Rise and Fall of Civic Education The Battle for Social Studies in a Shifting Historical Landscape investigates the changing definitions and purposes ascribed to social studies in the United States through time This result is viewed through the rising tensions from culture wars as America's divisive politics fight to control the narrative of the disciplines within social studies

Planning and Design for Sustainable Urban Mobility UN-Habitat, 2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world's leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning

Sustainable Cities and Cities and Climate Change *The End of Public Schools* David W. Hursh, 2015-10-16 The End of Public Schools analyzes the effect of foundations corporations and non governmental organizations on the rise of neoliberal principles in public education By first contextualizing the privatization of education within the context of a larger educational crisis and with particular emphasis on the Gates Foundation and influential state and national politicians it describes how specific policies that limit public control are advanced across all levels Informed by a thorough understanding of issues such as standardized testing teacher tenure and charter schools David Hursh provides a political and pedagogical critique of the current school reform movement as well details about the increasing resistance efforts on the part of parents teachers and the general public **Steel Odyssey** Ohjoon KWON, JOO Choi, Hae-Geon LEE, 2024-07-15 In this wide ranging interdisciplinary work the authors draw on history anthropology and materials engineering to present a comprehensive and ambitious examination of the multifaceted roles of iron and steel throughout history and the current and future challenges faced by the steel industry Ohjoon Kwon Joo Choi and Hae Geon Lee provide readers with an in depth understanding of the history of iron and steel and their impact on human society from a materials engineering perspective They begin by describing the characteristics of iron and steel and the history of human use of and interaction with these metals by compiling the fundamental knowledge necessary to understand iron s unique properties and metallurgical phenomena Following this they explain the influence of steel on human society and culture focusing on Industrial Revolution and warfare They also give examples that are rarely discussed elsewhere such as developments in Asia or iron s influence on thought and philosophy using Confucianism and Marxism as examples Readers will then be able to apply this contextual knowledge to address the profound impact of emerging challenges such as global environmental issues and the Fourth Industrial Revolution Despite the technical nature of this book all terminology is fully explained to facilitate better comprehension for those who may not possess an engineering education or a direct interest in metallurgy This book is therefore invaluable not only as a technical book but also as a guide to the development history of human civilization and its future challenges
