Scientific Data Mining and Knowledge Discovery Mohamed Medhat Gaber,2009-09-19 Mohamed Medhat Gaber It is not my aim to surprise or shock you but the simplest way I can summarise is to say that there are now in the world machines that think that learn and that create Moreover their ability to do these things is going to increase rapidly until in a visible future the range of problems they can handle will be coextensive with the range to which the human mind has been applied by Herbert A Simon 1916 2001 1 Overview This book suits both graduate students and researchers with a focus on discovering knowledge from scientific data The use of computational power for data analysis and knowledge discovery in scientific disciplines has found its roots with the revolution of high performance computing systems Computational science in physics chemistry and biology represents the first step towards automation of data analysis tasks The rationale behind the development of computational science in different areas was automating mathematical operations performed in those areas There was no attention paid to the scientific discovery process Automated Scientific Discovery ASD 1 3 represents the second natural step ASD attempted to automate the process of theory discovery supported by studies in philosophy of science and cognitive sciences Although early research articles have shown great successes the area has not evolved due to many reasons The most important reason was the lack of interaction between scientists and the automating systems

play a key role The critical algorithms used in GIS however are notoriously difficult to both teach and understand in part due to the lack of a coherent representation GIS Algorithms attempts to address this problem by combining rigorous formal language with example case studies and student exercises Using Python code throughout Xiao breaks the subject down into three fundamental areas Geometric Algorithms Spatial Indexing Spatial Analysis and Modelling With its comprehensive coverage of the many algorithms involved GIS Algorithms is a key new textbook in this complex and critical area of geography

Standards-based School Mathematics Curricula Sharon L. Senk,Denisse R. Thompson,2020-07-24 The Curriculum and Evaluation Standards for School Mathematics published by the National Council of Teachers of Mathematics in 1989 set forth a broad vision of mathematical content and pedagogy for grades K 12 in the United States These Standards prompted the development of Standards based mathematics curricula What features characterize Standards based curricula How well do such curricula work To answer these questions the editors invited researchers who had investigated the implementation of 12 different Standards based mathematics curricula to describe the effects of these curricula on students learning and achievement and to provide evidence for any claims they made In particular authors were asked to identify content on which performance of students using Standards based materials differed from that of students using more traditional materials and content on which performance of these two groups of students was virtually identical Additionally four scholars not involved with the development of any of the materials were invited to write critical commentaries on the work reported in the other chapters Section I of Standards Based School Mathematics Curricula provides a historical background to place the current curriculum reform efforts in perspective a summary of recent recommendations to reform school mathematics and a discussion of issues that arise when conducting research on student outcomes Sections II III and IV are devoted to research on mathematics curriculum projects for elementary middle and high schools respectively The final section is a commentary by Jeremy Kilpatrick Regents Professor of Mathematics Education at the University of Georgia on the research reported in this book It provides a historical perspective on the use of research to guide mathematics curriculum reform in schools and makes additional recommendations for further research In addition to the references provided at the end of each chapter other references about the Standards based curriculum projects are provided at the end of the book This volume is a valuable resource for all participants in discussions about school mathematics curricula including professors and graduate students interested in mathematics education curriculum development program evaluation or the history of education educational policy makers teachers parents principals and other school administrators The editors hope that the large body of empirical evidence and the thoughtful discussion of educational values found in this book will enable readers to engage in informed civil discourse about the goals and methods of school mathematics curricula and related research

African Border Disorders Olivier J. Walther,William F.S. Miles,2017-09-01 Since the end of the Cold War the monopoly of legitimate organized force of many African states has been eroded by a mix of rebel groups violent

extremist organizations and self defence militias created in response to the rise in organized violence on the continent African Border Disorders explores the complex relationships that bind states transnational rebels and extremist organizations and borders on the African continent Combining cutting edge network science with geographical analysis the first part of the book highlights how the fluid alliances and conflicts between rebels violent extremist organizations and states shape in large measure regional patterns of violence in Africa The second part of the book examines the spread of Islamist violence around Lake Chad through the lens of the violent Nigerian Islamist group Boko Haram which has evolved from a nationally oriented militia group to an internationally networked organization The third part of the book explores how violent extremist organizations conceptualize state boundaries and territory and reciprocally how do the civil society and the state respond to the rise of transnational organizations The book will be essential reading for all students and specialists of African politics and security studies particularly those specializing on fragile states sovereignty new wars and borders as well as governments and international organizations involved in conflict prevention and early intervention in the region The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
