

Nervous System Worksheet

1.) Label the neuron.

2.) Color the diagram as suggested below.

3.) There are three different kinds of neurons or nerve cells. Match each kind with its function.

Motor Neuron: The nerve cell that transmits impulses from the brain or spinal cord to a muscle or gland.

Sensory Neuron: The nerve cell that carries impulses from a sense receptor to the brain or spinal cord.

Relay Neuron: The nerve that connects sensory and motor neurons.

Match term with description:

Synapse - The connection between adjacent neurons.

Axon - The long fiber that carries the nerve impulses.

Long-term Potentiation Tim V. P. Bliss,G. L. Collingridge,Richard G. M. Morris,2004 In the thirty years since its discovery by Terje Lomo and Tim Bliss Long Term Potentiation LTP has become one of the most extensively studied topics in

contemporary neuroscience In LTP the strength of synapses between neurons is potentiated following brief but intense activation LTP is thought to play a central role in learning and memory though the exact nature of its role is less clear In spite of years of research there are many questions about LTP regarding its functional relevance that remain unanswered for example is it a model of memory formation or is the actual neural mechanism used by the brain to store information This volume presents a state of the art account of LTP It begins with lively accounts by the scientists most closely involved of the discovery of LTP and of the experiments that established its basic properties and induction mechanisms Later contributions contain reviews and new research that cover the range of molecular cellular physiological and behavioural approaches to the study of LTP Provocative accessible and authoritative this book makes it clear why LTP continues in equal measure to puzzle and beguile neuroscientists today Advance praise for Long Term Potentiation This book provides a definitive overview of the development of ideas about synaptic plasticity and about the wide range of current research in this fascinating field Colin Blakemore University of Oxford
