21st Century How can human civilization continue to develop without destroying the natural systems on which it depends Environmentalists tell us that capitalism is the problem because it feeds our self interest They tell us that we have to restrain ourselves and only consume what the Earth can sustain Or governments must tell us what we can and cannot buy This book uses the science of complex systems to explain why governments cannot deliver sustainability or happiness and how self interest can be used to make society sustainable Capitalism won the Cold War until the Great Recession of 2008 it seemed to be the perfect system But more of us are unhappy even as it has ravaged the planet The central problem is the paradigm on which our social systems are founded that more consumption production possessions is always better Based on research from political economy philosophy and psychology this book shows that the problem is not self interest We are unhappy because we have been taught that our interests are material and that buying stuff will make us happy Yet social pressure to consume only prevents us from satisfying our basic psychological needs and fully enjoying life For that we need to pursue our personal well being Because this also reduces our material consumption environmental sustainability comes from each of us knowing what s truly good for our selves Even without the constant economic growth that harms the planet and damages our lives capitalism also is sustainable This book will be of interest to scholars and students of sustainability civil society activists and social entrepreneurs thought leaders and policymakers

**The Neurodiversity Playbook** Matthew Zakreski, Psy.D., 2024-11-08 This book represents a summation of a decade's worth of therapy research workshops and presentations around the unique aspects of social emotional development in the neurodivergent community. The book grounds its approach in neuroscience and then applies those data to how our brains impact our thoughts, feelings, and behaviors. As a child psychologist who specializes in working with this population, I pride myself on identifying the challenging aspects of having a different brain and empowering kids to manage those differences. As such, this book will contain sections that directly address the parts of being gifted that have traditionally been emphasized less: making friends, maintaining relationships, regulating emotions, communicating your feelings and needs appropriately, and being able to identify contextual factors to understand why people are acting the way they are. Naming the issues is one thing, but each section will contain case examples, clinical advice, and tangible skills that will help students grow in the areas of social emotional learning (SEL). These skills are deliverable, generalizable, and appropriate for school, home, and the community. Most importantly, they work. I often say that I want my clients to have a little pocket Dr. Matt to help them navigate the world; this book is my attempt at creating that kind of external support.

**Critical Thinking** Joseph Zornado, Jill Harrison, Daniel Weisman, 2019-11-19 Critical Thinking presents, defines, and explains the intellectual skills and habits of mind that comprise critical thinking and its relationship to social justice. It shows how critical thinking, cultural cognition, and critical awareness lead to the possibility of solutions grounded in social justice. All college students, especially those in the social sciences and humanities, will develop the intellectual skills necessary for critically engaging information in order to become active learners and effective agents in the world.
