Unmanned and Autonomous Ships R. Glenn Wright, 2020-03-11 Unmanned ships and autonomous ships are quickly becoming a reality making shipping safer and more efficient However traditional tasks and functions are becoming blurred as new technology changes how the unique needs of different sectors are met In addition to large vessels dedicated to the transport of goods and cargos across the oceans major efforts are underway towards the automation of small coastal shipping that includes ferries tugboats supply and service vessels and barges Automated vehicles are also replacing conventional ships for inspecting and servicing pipelines drilling platforms wind farms and other offshore installations Automated shipping is explored in terms of economics technology safety and the environment under the broad themes of ship design and engineering command and control navigation communications security regulatory issues and training This includes initiatives for autonomous shipping as well as civilian implications of military ship automation programs This book is primarily for maritime professionals regulatory authorities insurers and environmental groups It also suits undergraduate students involved in deck officer training and graduate students and academics involved in research in ship design operations and management

**Reeds 21st Century Ship Management** John W Dickie, 2014-04-17 The first modern title to cover the varied and complex world of ship management in the 21st century Ship management has constantly had to evolve to take into account the advancements in technology as well as the demands of the shipping industry Having internet access and email on board ship has meant that the ship manager has to possess certain sets of skills to function effectively in

the post including computer literacy The emergence of large multi national ship management companies has also changed how business is conducted and this in turn means that the ship manager and tiers of management within the organization have had to evolve to cope with the demands of working with a multi national workforce Furthermore since the mid 1980s there has been an ever expanding raft of legislation that is more restrictive for companies to meet and a shrinking of profit margins has seen a shift in how companies are required to operate to survive This book addresses the demands of 21st century ship management with the focus of the book as much on the people who manage ships as on the theory and practice of ship management

**Port Security Management, Second Edition** Kenneth Christopher, 2014-06-20 Sea and freshwater ports are a key component of critical infrastructure and essential for maintaining global and domestic economies In order to effectively secure a dynamic port facility operation one must understand the business of maritime commerce Following in the tradition of its bestselling predecessor Port Security Management Second Edition continues to supply readers with this understanding This fully updated edition covers the latest in continuously changing legislation regarding federal mandates securing vessels cargo security and granting employee credentials Focusing on best practices it details real world solutions that law enforcement authorities and security management professionals can put to use immediately Assuming little prior knowledge of the industry the book examines port security in the context of global transportation systems It supplies practitioners and educators with a framework for managing port security and details risk assessment and physical security best practices for securing ships and ports The book explains how the various stakeholders including port management security government and private industry can collaborate to develop safe and secure best practices while maintaining efficient operations Addressing the legislative measures regulatory issues and logistical aspects of port security the book includes coverage of cruise ships cargo security CT PAT and emergency operations Complete with a new chapter on intelligence this book is ideal for anyone with a vested interest in secure and prosperous port facilities who wants to truly understand how to best tackle the management of port security

Port Infrastructure Finance Hilde Meersman, Eddy Van de Voorde, Thierry Vanelander, 2014-06-20 This book provides an expert analysis of alternative investments routes and the investment strategies available to the major port players and is a much needed guide to expanding the investor base for private debt funding of projects from loan providers to bond investors Port infrastructure investments are vitally important to all ports throughout the world without these investments the competitive position of ports and of the dependent logistics sector will deteriorate National regional governments and the local port authorities are no longer a guaranteed source of sufficient financial input to meet the continuous port infrastructure investment needs of major ports It is therefore increasingly crucial for ports to broaden their strategies and secure alternative streams of investment This book provides expert insight into areas of port infrastructure finance across the main regions of Europe Asia Africa and the USA Topics include how to estimate future demand by way of forecasting Public Private Partnerships corporatisation the pricing

mechanisms for syndicated loans European port privatisation finance strategies for ports in Asia the USA and Africa and a discussion of the investment strategies available to the major port players Port Infrastructure Finance is an invaluable book for all parties involved in the port and maritime business as well as investment companies banks and other financial institutions involved in infrastructure investment Maritime Security and Indonesia Senia Febrica, 2017-03-27 Indonesia is the largest archipelago state in the world comprising 17 480 islands with a maritime territory measuring close to 6 million square kilometres It is located between the two key shipping routes of the Pacific and Indian Ocean Indonesia's cooperation in maritime security initiatives is vitally important because half of the world's trading goods and oil pass through Indonesian waters including the Straits of Malacca the Strait of Sunda and the Strait of Lombok This book analyses Indonesia's participation in international maritime security cooperation Using Indonesia as a case study the book adopts mixed methods to assess emerging power cooperation and non cooperation drawing from various International Relations theories and the bureaucratic politics approach It addresses not only the topic of Indonesia's cooperation but also engages in debates across the International Relations political science and policy studies disciplines regarding state cooperation Based on extensive primary Indonesian language sources and original interviews the author offers a conceptual discussion on the reasons underlying emerging middle power participation or non participation in cooperation agreements The analysis offers a fresh perspective on the growing problems of maritime terrorism and sea robbery and how an emerging power deals with these threats at unilateral bilateral regional and multilateral levels The book fills a significant gap in literature on Indonesian foreign policy making in the post 1998 era It provides the first in depth study of Indonesia's decision making process in the area of maritime security and will thus be of interest to researchers in the field of comparative politics international relations security policy maritime cooperation port and shipping businesses and Southeast Asian politics and society The Transnational Governance of Violence and Crime A. Jakobi, K. Wolf, 2013-10-25 Building upon a range of case studies that range from civil war to maritime security and cyber crime the contributors analyse how non state actors can and should be involved in contributing to state and human security *IMO News*, 2017 Globalization Contained L. Hoovestel, 2013-09-19 Examining the global significance of the freight container with particular emphasis on the perspectives of the US and China Globalization Contained considers the implications of the freight container as an agent of change for the future of the global economy and global security New Challenges for the EU Internal Security Strategy Maria O'Neill, Ken Swinton, Aaron Winter, 2013-07-16 In recent years the EU and its member states have experienced a number of changes as well as challenges in the areas of politics economics security and law As these areas are interconnected changes and challenges to any of them have implications for the others as well as implications for the populations and institutions of the EU or those coming into contact with its international power and influence This edited collection focuses primarily on security and law particularly the EU's internal security strategy The EU's Internal Security Strategy adopted by the Spanish

presidency early in 2010 followed the Lisbon Treaty in 2009 building on previous developments within the EU in the Area of Freedom Security and Justice AFSJ policy The focus of the EU Internal Security Strategy is to prevent and combat serious and organised crime terrorism and cybercrime in strengthening the management of our external borders and in building resilience to natural and man made disasters The Internal Security strategy intersects and overlaps with the European Union s Counter terrorism strategy the Strategy for the External Dimension of JHA and the EU s Security Strategy The role of and interaction between these strategies their supplementing documents and their implications for crime victims the law political relations democracy and human rights form the backdrop against which the chapters in this collection are written Building on original research by its contributors this collection comprises work by authors from a wide variety of academic and professional areas and perspectives as well as different countries on a variety of areas and issues related to or raised by the EU s Internal Security Strategy from intelligence led policing to human trafficking and port security This book examines from a wide variety of disciplinary perspectives including law geography politics and practice both this further refinement of existing internal provisions on cross border crime and the increasing external relations of the EU in the AFSJ

**Somali Piracy** Jade Lindley, 2016-06-23 Maritime piracy off the coast of Somalia was first recognised as a global concern in 2008 after the hijackings of World Food Programme vessels It remains a serious impediment to international maritime trade and a significant risk to seafarers Bringing a criminological perspective to the subject this book presents an analysis of Somali piracy by means of Routine Activity Theory and regulatory pluralism Based on data from a range of sources including published documents and in depth interviews with representatives of industry government and international organisations the study concludes that no one institution or policy will suffice to control Somali piracy Accordingly a number of different actors and institutions have a role to play in reducing the supply of motivated offenders the vulnerability of prospective victims and in enhancing guardianship The book envisages a holistic counter piracy program based on a pluralistic regulatory model that is sustainable within the region and managed by the region providing the best opportunity for both the immediate future and for long term success This study will be essential reading for criminologists public policy and legal scholars as well as policy makers and regulators in countries affected by and dealing with piracy and international professional advocacy groups operating in the maritime space

**Policing, Port Security and Crime Control** Yarin Eski, 2016-06-10 Ports are the vital hubs of the maritime transport industry and crucial to the flow of global trade The protection of this global supply chain from crime and terrorism is a fundamental objective of port security and is a landscape beset by new challenges and changes post 9 11 Building on multi sited ethnographic fieldwork in two major European ports Yarin Eski discusses how operational policing and security realities and identities are established and examines how industrial commercialization has aggravated security issues Policing Port Security and Crime Control offers a compelling empirically balanced account of the attitudes and practices of port police officers and security officers exploring the everyday realities and ambitions of these

street level professionals as they seek to re establish a meaningful occupational identity In doing so this book presents a criminological understanding of the way that security questions and procedures are integrated into the daily lives of those that protect the industrial port sites where they themselves must interrupt the global supply chain in order to defend it Exploring topics such as port security management multi agency policing port theft drug trafficking human smuggling and terrorism this book offers a major contribution to the growing literature on transnational crime and security and is one of the first to offer an ethnographic approach to port security This book is interdisciplinary and will appeal to criminologists sociologists ethnographers and those engaged with policing and security studies as well as professionals in the field of multi agency policing border control security and governance of the port and wider maritime industry **Maritime Security:**

**Counter-Terrorism Lessons from Maritime Piracy and Narcotics Interdiction** E.R. Lucas,S. Rivera-Paez,T.

Crosbie,2020-08-04 It can be easy to forget the critical role that maritime transport plays in the global economy but international maritime transportation is still responsible for around 90% of global trade Protecting the maritime infrastructure essential for this trade from terrorism is a major concern for the international community This book originates from the NATO Advanced Research Workshop ARW Counter Terrorism Lessons from Maritime Piracy and Narcotics Interdiction held in Copenhagen Denmark in May 2019 Participants in the three day workshop included policymakers senior military officers and academics from NATO member states international organizations and two partner nations Colombia and Israel Their extensive discussions focused on methods for protecting critical maritime infrastructure such as ports supplies and personnel from seaborne terrorist attacks Presentations and roundtables also addressed the human and social factors that contribute to the defense against terrorism in the maritime domain The book is divided into three sections organized crime and narcotrafficking maritime piracy and terrorism and aims to bridge the gaps between these three substantive areas of maritime security research These have remained largely separate areas of research in the past with the result that valuable maritime security lessons from counter piracy and counter narcotics operations have not been fully incorporated into counter terrorism best practice The book facilitates the transmission of lessons learned from counter piracy and counter narcotic operations to formulate recommendations for best practice and technological innovations to manage maritime terrorism and will be of interest to all those working in the field **Maritime Skills on Vessels & Shore - The STCW**

**Convention's Relevance & Recommendations** Dr. (Capt.) Vivek Jain,2023-07-11 This Book is of the seafarers by the seafarers for the seafarers Seafarers are the core of all maritime trade and their expectations perspectives alone should be at the centre of all solutions for maritime skills Taking this standpoint the editor has explored the issues of maritime skills with critical gaps following a framework of research methodology The issue of critical gaps in maritime skills is further exacerbated due to the impact on seafarers caused by changes in the ecosystem status relationship with stakeholders technology focus on renewable energy anxiety levels and so forth Furthermore stakeholders can no longer ignore the fact

that seafarers are leaving a seagoing career after working for only a few years Therefore the editor has also explored the need to prepare seafarers for transition into maritime shore jobs to preserve their maritime skills within the maritime industry This exhaustive book can be used as a guide for further revisions or a revamp of the current STCW Convention The editor thereafter divided the researched critical gaps in maritime skills into four groups Jain s Model for Maritime Skills Panoptic Social Intelligence Upskilling Reskilling for onboard vessels skills and Portable Skills for future shore jobs Panoptic and Social Skills are core skills required for both on board vessels as well for maritime shore jobs Thereafter the editor embarked on a voyage to discover persuade collaborate with a number of exceptionally experienced subject matter experts over many months to collaboratively pursue many mini research projects across all selected maritime skills adopting specific methodology to plug these critical gaps These experts were drawn 1 from countries such as India the Philippines Romania South Korea Malaysia UAE the UK and Singapore 2 from both genders 3 from deck engine professionals settled ashore 4 with current experience in the industry and or at sea at a fundamental level and 5 from seafaring supplying nations recognising experiencing the relevant socio economic circumstances of seafarers From this book seafarers will not only find ideas on how to plug gaps in their maritime skills but also how they can transition with their existing skills to other maritime jobs such as marine superintendents marine managers designated persons ashore managers supervising new build second hand vessels IT managers in the maritime domain marine surveyors marine experts investigators marine pilots in ports maritime arbitrators managers in shipyards and so forth The solutions in this book will also resolve the issue of the shortage and retention of seafarers

*Indian and American Perspectives on Technological Developments in the Maritime Domain and Their Strategic Implications in the Indian Ocean Region* Vice Admiral Pradeep Kaushiva, Commander Kamlesh K Agnihotri, 2013-04-15

The maritime domain hosting the highways of global prosperity through trade industrial raw material and energy links rates high in its potential for conflict As the global pendulum of economic vibrancy swings eastwards the Indian Ocean Region IOR has been receiving increasing attention from all actors state as well as non state ones and now presents itself in sharp focus as one of the volatile seascapes on this earth The navies operating in the region will therefore need to depend on high technology and associated doctrines and procedures so as to effectively deal with the wide spectrum of challenges therein It will also become incumbent upon such littoral states as can afford the high cost of technology to catch up so as to maintain their relevance in the great game being played out in their very own backyard The United States as a leader in inventing and exploiting technology sets its own benchmarks in internalization of advanced technologies to undertake maritime missions at and from the sea in support of its military operations ashore China on the other hand has been striving towards achieving asymmetric war fighting capabilities supported by other developing technologies as well as core capabilities like the Beidou position fixing system which would be central to network centric operations including missile guidance systems As the IOR increasingly transforms into an arena of extra regional power play the implications of

technologically enabled confrontations and their impact on resident states are poised to weigh in on a scale never imagined before There is thus a greater need for India to gain in depth knowledge of and develop a perspective on advanced technology sensors weapons supporting infrastructures doctrines and futuristic concepts in the maritime domain and their potential as strategic game changers in the IOR This book aims to foster greater understanding of the challenges facing the IOR and also look at how the technological advances in the maritime domain may possibly handle such challenges It should provide useful resource material to those investigating the impact of technology on meeting the maritime challenges in the IOR     *Proceedings of the Marine Safety & Security Council ,2016*
