

Course Syllabus

Course Description

This class will explore and study the definition of life and the processes of life. The main unifying themes include a detailed study of the basic cellular structures and processes of living organisms, as well as detailed investigation of plants and animals, along with their relationship to the environment. Laboratory dissection and fieldwork is required. Careful consideration is given to the creation-evolution debate, as the theories of evolution are compared to the biblical account of the origin of life.

Curricular Rationale

This course will continue to increase appreciation and love for God as creator through study of His intricate design of life. The basic methods of scientific study and research will be developed more thoroughly. Students will learn extensive biological vocabulary and processes.

Course Objective

Upon successful completion of this course the student will be able to:

1. Select the problem, hypothesis, data, control, and conclusion of an experiment using a lab format.
2. Recognize and classify living organisms according to their external characteristics and demonstrate in both oral and written responses.
3. Compare the structures and functions of living organisms in a lab setting.
4. Describe the body systems of the organisms using the frog dissection and other dissections.
5. Develop their psychomotor skills in laboratory exercises.
6. Care for and operate the compound microscope through a variety of lab exercises.
7. Make slide preparations properly.
8. Develop dissecting skills through the use of varied preserved specimens.
