A complete introduction to geometry Investigate the world of planes and solids with this revised edition of Geometry Students go beyond the basics of geometry Chapter openers and colorful photos invite students into the text They explore geometric solids triangles the Pythagorean Theorem quadratic equations length area and volume Throughout Geometry presents short lively lessons students can grasp easily Illustrated examples abound Features include Estimation Activities Algebra Review and Geometry in Your Life Calculator Practice exercises make use of the special features of graphing calculators Best of all students learn to apply geometry to situations in their own lives Overall this high interest low readability text makes it easy for you to engage students who struggle with reading language or a learning disability Lexile Level 820 Reading Level 4 5 Interest Level 7 12 **Geometry** Boyd,2004-08-01 **Geometry** Jean A. Giarrusso,1989-10 *Geometry, Grade 4 Workbook* Maria Miller,2016-02-05 We start Geometry Grade 4 Workbook by reviewing the concepts of area and the perimeter of rectangles third grade topics Students get to apply these concepts in problem solving including problems where they write simple equations and explore possible perimeters for a given fixed area The focus of this workbook is angles Students learn about lines rays and angles and about acute right obtuse and straight angles Next they learn how to measure and draw angles with a protractor We also study angle problems where students write simple equations and estimate some common angles The lesson Parallel and Perpendicular Lines ties in with the topic of angles because perpendicular means to be at a right angle Next we study parallelograms and other quadrilaterals in more detail paying attention to the angles and side lengths in them We study triangles and classify them according to the angles The last topic for this workbook an easy one is line symmetry The study of geometry is full of strange sounding words to learn I encourage you to let the student s keep a geometry notebook where they will write every new concept or term and draw a picture or pictures and text to explain the term The students could also do the drawing exercises from this workbook in this notebook It will then become their very own geometry book and while working with it it helps them to learn and remember the terms and concepts better
