Supporting Neurodiverse College Student Success Elizabeth M.H.

Coghill,Jeffrey G. Coghill,2020-11-12 The basic premise of neurodiversity is that there is no normal baseline for brain processes but that all individual brains vary and therefore are diverse The CAST organization estimates that 11% of college students enrolling in post secondary campuses having a learning disability or learning difference As neurodiverse students enroll in post secondary education the environments within which these students learn can either support or impede their ability to succeed Simply put a neurodiverse campus population means that educators recognize that all students process and learn differently and must adapt our approaches and services in order to reach and support all students enrolled on our campuses Neurodiverse students are a growing population on today's college campus Their growing presence prompts new approaches to support their success and change traditional student services and collegiate experiences This practical guide Assists readers in better understanding neurodiverse students and the way campus services can create welcoming environmentsExplores the role Universal Design for Learning UDL and Executive Functioning EF plays in student success
