American Labor and Economic Citizenship Mark Hendrickson, 2013-05-27 Once viewed as a distinct era characterized by intense bigotry nostalgia for simpler times and a revulsion against active government the 1920s have been rediscovered by historians in recent decades as a time when Herbert Hoover and his allies worked to significantly reform economic policy Mark Hendrickson both augments and amends this view by studying the origins and development of New Era policy expertise and knowledge Policy oriented social scientists in government trade union academic and nonprofit

agencies showed how methods for achieving stable economic growth through increased productivity could both defang the dreaded business cycle and defuse the pattern of hostile class relations that Gilded Age depressions had helped to set as an American system of industrial relations **A Tale of Three Cities** John Lynch, 1998-07-13 The city of Belfast tends to be discussed in terms of its distinctiveness from the rest of Ireland an industrial city in an agricultural country However when compared with another British industrial port such as Bristol it is the similarities rather than the differences that are surprising When these cities are compared with Dublin the contrasts become even more painfully evident This book seeks to explore these contrasting urban centres at the start of the twentieth century The ANC's Early Years Peter

Limb, 2024-12-02 The African National Congress ANC is the oldest and most durable of African nationalist movements not only in South Africa but also across the continent Since 1994 it has governed the country as leader of the Tripartite Alliance with the Congress of South African Trade Unions Cosatu and South African Communist Party SACP The early decades of the twentieth century saw the establishment survival and growth of ANC and black labour organisations This book focuses on the formative period of engagement of these political and socioeconomic forces before permanent alliances emerged It analyses the ANC's attitudes and relationships with the nascent formations of the black working class with particular attention to the most conscious and active workers The subject matter in this book also discusses migrant rural domestic and women workers not always then clearly defined as part of a formal working class Print editions not for sale in Sub Saharan Africa This book is part of Routledge's co published series 30 Years of Democracy in South Africa in collaboration with UNISA Press which reflects on the past years of a democratic South Africa and assesses the future opportunities and challenges Systemic Functional Linguistics and Critical Discourse Analysis Lynne Young, Claire Harrison, 2004-05-01 Any piece of primary research ought to be preceded by a systematic review The key advantage of a systematic review over the traditional narrative review is its ability to identify all the available evidence in a systematic and reliable manner This book describes a the key steps to undertaking a systematic review and b the process of undertaking a meta analysis The book includes step by step examples of how to design data extraction forms search strategies and combine in a meta analysis *Britain's Imperial Retreat from China, 1900-1931* Phoebe Chow, 2016-07-15 Britain's relationship with China in the nineteenth and early twentieth century is often viewed in terms of gunboat diplomacy unequal treaties and the unrelenting pursuit of Britain's own commercial interests This book however based on extensive original research demonstrates that in Britain after the First World War a combination of liberal Labour party pacifist missionary and some business opinion began to argue for imperial retreat from China and that this movement gathered sufficient momentum for a sympathetic attitude to Chinese demands becoming official Foreign Office policy in 1926 The book considers the various strands of this movement relates developments in Britain to the changing situation in China especially the rise of nationalism and the Guomindang and argues that contrary to what many people think the reassertion of China's national rights was begun successfully in this period

rather than after the Communist takeover in 1949

A History of International Thought Lucian Ashworth, 2014-01-10

International thought is the product of major political changes over the last few centuries especially the development of the modern state and the industrialisation of the world economy While the question of how to deal with strangers from other communities has been a constant throughout human history it is only in recent centuries that the question of foreign relations and especially imperialism and war have become a matter of urgency for all sectors of society throughout the world This book provides the first comprehensive overview of the evolution of Western international thought and charts how this evolved into the predominantly Anglophone field of International Relations Along the way several myths of the origins of International Relations are explored and exposed the myth of the peace of Westphalia the myths of Versailles and the nature of the League of Nations the realist idealist Great Debate myth and the myth of appeasement Major approaches to the study of international affairs are discussed within their context and on their own terms rather than being shoe horned into anachronistic paradigms Written in a clear and accessible style Ashworth s analysis reveals how historical myths have been used as gatekeeping devices and how a critical re evaluation of the history of international thought can affect how we see international affairs today
