Africa in the Age of Globalisation Assoc Prof Edward Shizha,Assoc Prof Lamine Diallo,2015-04-28 This is a collection of bold and visionary scholarship that reveals an insightful exposition of re visioning African development from African perspectives It provides educators policy makers social workers non governmental agencies and development agencies with an interdisciplinary conceptual base that can effectively guide them in planning and implementing programs for socio economic development in Africa The book provides up to date scholarly research on continental trends on various subjects and concerns of paramount importance to globalisation and development in Africa politics democracy education gender technology global relationships and the role of non governmental organisations The authors challenge the familiar paradigms in order to show how imperfectly if at all assumptions about globalisation and development theories have failed in their depictions and applications to Africa The scholars in this volume both inform and advocate for a re visioning of perceptions on Africa and how it navigates global processes

Southeast Asian Migration Khatharya Um,Sofia Gaspar,2015-10-01 Southeast Asia has long been a crossroad of cultural influence and transnational movement but the massive migration of Southeast Asians throughout the world in recent decades is historically unprecedented Dispersal compelled by economic circumstance political turmoil and war engenders personal familial and spiritual dislocation and provokes a questioning of identity and belonging This volume features original works by scholars from Asia America and Europe that highlight these trends and perspectives on Southeast Asian migration within and beyond the Asia Pacific region Adopting an interdisciplinary approach with contributions from sociology political science anthropology and history and anchored in empirical case studies from various Southeast Asian countries it extends the scope of inquiry beyond the economic concerns of migration and beyond a single country source or destination and disciplinary focus Analytic focus is placed on the forces and factors that shape migration trajectories and migrant incorporation

experiences in Asia and Europe the impact of migration and immigration status on individuals families and institutions on questions of equity inclusion and identity and the triangulated relationships between diasporic communities the sending and receiving countries Of particular importance is the scholarly attention to lesser known populations and issues such as Vietnamese in Poland children and the 1 5 generation immigrants health and mental consequences of state sponsored violence and protracted encampment ethnic media and the challenges of both transnational parenting and family reunification In examining the complex and creative negotiations that immigrants engage locally and transnationally in their daily lives it foregrounds immigrant resilience in the strategies they adopt not only to survive but thrive in displacement

The Omega Principle Paul Greenberg,2018-07-10 By the bestselling author of Four Fish and American Catch an eye opening investigation of the history science and business behind omega 3 fatty acids the miracle compound whose story is intertwined with human health and the future of our planet Omega 3 fatty acids have long been celebrated by doctors and dieticians as key to a healthy heart and a sharper brain In the last few decades that promise has been encapsulated in one of America s most popular dietary supplements Omega 3s are today a multi billion dollar business and sales are still growing apace even as recent medical studies caution that the promise of omega 3s may not be what it first appeared But a closer look at the omega 3 sensation reveals something much deeper and more troubling The miracle pill is only the latest product of the reduction industry a vast global endeavor that over the last century has boiled down trillions of pounds of marine life into animal feed fertilizer margarine and dietary supplements The creatures that are the victims of that industry seem insignificant to the untrained eye but turn out to be essential to the survival of whales penguins and fish of all kinds including many that we love to eat Behind these tiny molecules is a big story of the push and pull of science and business of the fate of our oceans in a human dominated age of the explosion of land food at the expense of healthier and more sustainable seafood of the human quest for health and long life at all costs James Beard Award winning author Paul Greenberg probes the rich and surprising history of omega 3s from the dawn of complex life when these compounds were first formed to human prehistory when the discovery of seafood may have produced major cognitive leaps for our species and on to the modern era when omega 3s may point the way to a bold new direction for our food system With wit and boundless curiosity Greenberg brings us along on his travels from Peru to Antarctica from the Canary Islands to the Amalfi Coast to reveal firsthand the practice and repercussions of our unbalanced way of eating Rigorously reported and winningly told The Omega Principle is a powerful argument for a more deliberate and forward thinking relationship to the food we eat and the oceans that sustain us

Proceedings of the 2014 Energy Materials Conference The Minerals, Metals & Materials Society (TMS),2015-04-15 This DVD contains a collection of papers presented at EnergyMaterials 2014 a conference organized jointly by The Chinese Society for Metals CSM and The Minerals Metals Materials Society TMS and held November 4 6 2014 in Xi an Shaanxi Province China With the rapid growth of the world s energy production and consumption the important role of energy materials has achieved

worldwide acknowledgement Material producers and consumers constantly seek the possibility of increasing strength improving fabrication and service performance simplifying processes and reducing costs Energy Materials 2014 has provided a forum for academics researchers and engineers around the world to exchange state of the art development and information on issues related to energy materials The papers on the DVD are organized around the following topics Materials for Coal Based Systems Materials for Gas Turbine Systems Materials for Nuclear Systems Materials for Oil and Gas Materials for Pressure Vessels Van Nostrand's Scientific Encyclopedia Douglas M. Considine, Glenn D. Considine, 2013-12-11

Advancements in science and engineering have occurred at a surprisingly rapid pace since the release of the seventh edition of this encyclopedia Large portions of the reference have required comprehensive rewriting and new illustrations Scores of new topics have been included to create this thoroughly updated eighth edition The appearance of this new edition in 1994 marks the continuation of a tradition commenced well over a half century ago in 1938 Van Nostrand's Scientific Encyclopedia First Edition was published and welcomed by educators worldwide at a time when what we know today as modern science was just getting underway The early encyclopedia was well received by students and educators alike during a critical time span when science became established as a major factor in shaping the progress and economy of individual nations and at the global level A vital need existed for a permanent science reference that could be updated periodically and made conveniently available to audiences that numbered in the millions The pioneering VNSE met these criteria and continues today as a reliable technical information source for making private and public decisions that present a backdrop of technical alternatives

The Early Years Foundation Stage Ioanna Palaiologou, 2024-08-09 The revised fifth edition of The Early Years Foundation Stage has been fully updated to cover revised EYFS revised Development Matters and policy shifts in the sector New to the book Brand new chapters on the Rights of the Child Children's Development Learning Theories and Planning New content on diversity and inclusion throughout all chapters New and updated case studies throughout the book including international cases Additions to chapters on children's mental health climate crisis and working with children post pandemic This market leading textbook is an essential guide for students helping them to develop an understanding of the EYFS curriculum and encouraging a critical view of the theory and policy behind it to strengthen their practice Restoring Opportunity Greg J. Duncan, Richard J. Murnane, 2014-01-01 In this landmark volume Greg J. Duncan and Richard J. Murnane lay out a meticulously researched case showing how in a time of spiraling inequality strategically targeted interventions and supports can help schools significantly improve the life chances of low income children The authors offer a brilliant synthesis of recent research on inequality and its effects on families children and schools They describe the interplay of social and economic factors that has made it increasingly hard for schools to counteract the effects of inequality and that has created a widening wedge between low and high income students Restoring Opportunity provides detailed portraits of proven initiatives that are transforming the lives of low income children from prekindergarten through high school All of these

programs are research tested and have demonstrated sustained effectiveness over time and at significant scale Together they offer a powerful vision of what good instruction in effective schools can look like The authors conclude by outlining the elements of a new agenda for education reform Restoring Opportunity is a crowning contribution from these two leading economists in the field of education and a passionate call to action on behalf of the young people on whom our nation s future depends Copublished with the Russell Sage Foundation *Resources in Education* ,1986 **Superminds** Thomas W. Malone,2018-05-15 From the founding director of the MIT Center for Collective Intelligence comes a fascinating look at the remarkable capacity for intelligence exhibited by groups of people and computers working together If you re like most people you probably believe that humans are the most intelligent animals on our planet But there s another kind of entity that can be far smarter groups of people In this groundbreaking book Thomas Malone the founding director of the MIT Center for Collective Intelligence shows how groups of people working together in superminds like hierarchies markets democracies and communities have been responsible for almost all human achievements in business government science and beyond And these collectively intelligent human groups are about to get much smarter Using dozens of striking examples and case studies Malone shows how computers can help create more intelligent superminds simply by connecting humans to one another in a variety of rich new ways And although it will probably happen more gradually than many people expect artificially intelligent computers will amplify the power of these superminds by doing increasingly complex kinds of thinking Together these changes will have far reaching implications for everything from the way we buy groceries and plan business strategies to how we respond to climate change and even for democracy itself By understanding how these collectively intelligent groups work we can learn how to harness their genius to achieve our human goals Drawing on cutting edge science and insights from a remarkable range of disciplines Superminds articulates a bold and utterly fascinating picture of the future that will change the ways you work and live both with other people and with computers *Understanding the Life Course* Lorraine Green,2016-12-20 Understanding the Life Course provides a uniquely comprehensive guide to the entire life course from an interdisciplinary perspective Combining important insights from sociology and psychology the book presents the concepts theoretical underpinnings in an accessible style supported by real life examples From birth and becoming a parent to death and grieving for the loss of others Lorraine Green explores all stages of the life course through key research studies and theories in conjunction with issues of social inequality and critical examination of lay viewpoints She highlights the many ways the life course can be interpreted including themes of linearity and multidirectionality continuity and discontinuity and the interplay between nature and nurture The second edition updates key data and includes additional material on topics such as new technologies changing markers of transitions to adulthood active ageing resilience and neuropsychology This comprehensive approach will continue to be essential reading for students on vocational programmes such as social work and nursing and will provide thought provoking insight into the wider contexts of the life course for

students of psychology and sociology **Childcare, Early Education and Social Inequality** Hans-Peter Blossfeld, Nevena Kulic, Jan Skopek, Moris Triventi, 2017-04-28 Recognising that social change over recent decades has strengthened the need for early childhood education and care this book seeks to answer what role this plays in creating and compensating for social inequalities in educational attainment **Sustaining Human Progress** Khalid Malik, 2014 Most people in most countries have been steadily better in human development Advances in technology and incomes hold ever greater for longer healthier more secure lives **Teach Me, I Dare You!** Judith Brough, Sherrell Bergmann, Larry Holt, 2013-10-18 This book provides practical tools for educators who work with disenchanted and disengaged youths It offers clear research based and explicit strategies for motivating connecting and intervening with these students The practical wisdom in this book demonstrates what you can do to connect these students to their schools and to a promising future Early Life Conditions and Rapid Demographic Changes in the Developing World Mary McEniry, 2013-11-04 This book examines the long term consequences of improvements in life expectancy in the mid 20th century which are partly responsible for the growth of the elderly population in the developing world Rapid demographic changes in child and infant mortality due to the reduction in and better treatment of disease were not often accompanied by parallel increases in standard of living Lower mortality led to greater survival by those who had suffered poor early life conditions As a consequence the early life of these survivors may explain older adult health and in particular the projected increase in adult health disease and diabetes Recent dietary changes may only compound such early life effects This study presents findings from historical and survey data on nearly 147 000 older adults in 20 low middle and high income countries which suggest that the survivors of poor early life conditions born during the 1930s 1960s are susceptible to disease later in life specifically diabetes and heart disease As the evidence that the aging process is shaped throughout the entire life course increases this book adds to the knowledge regarding early life events and older adult health *International Handbook of Research on Environmental Education* Robert B. Stevenson, Robert Stevenson, 2013 This handbook illuminates the most important concepts findings and theories from EE research critically examining its progression current debates what is still missing from the research agenda and where that agenda might be headed Published for the American Educational Research Association AERA
