Building upon the geography, civics and government, and economics concepts of the United States mastered in fourth grade and historical inquiry from earlier grades, the fifth grade expectations begin a more discipline-centered approach concentrating on the early history of the United States. Students begin their study of American history with American Indian people before the arrival of European explorers and conclude with the adoption of the Bill of Rights in 1791. Although the content expectations are organized by historical era, they build upon students' understanding of the other social studies disciplines from earlier grades and require students to apply these concepts within the context of American history.</p>	<p>What is Social Studies?</p> <ul style="list-style-type: none"> ○ Social Studies is the integrated study of the social sciences to prepare young people to become responsible citizens. ○ Responsible citizens display social understanding and civic efficacy. ○ Social understanding includes knowledge of the human condition, how it has changed over time, the variations that occur in different physical environments and cultural settings, and the emerging trends that appear likely to shape the future in an interdependent world. ○ Civic efficacy is the readiness and willingness to assume responsibilities of citizenship and to make informed and reasoned decisions for the public good in a pluralistic, democratic society.
