Preventing Chemical Weapons Michael Crowley, Malcolm Dando, Lijun Shang, 2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical weapons Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons Stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK Using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology assessing the risks of their misuse The book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the Chemical Weapons Convention in preventing the development and use of chemical weapons Through the employment of a novel Holistic Arms Control methodology the authors also look beyond the bounds of such treaties to explore the full range of international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse A particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all

Redefining Geek Cassidy Puckett, 2022-04-20 A surprising and deeply researched look at how everyone can develop tech fluency by focusing on five easily developed learning habits Picture a typical computer geek Likely white male and someone you'd say has a natural instinct for technology Yet after six years teaching technology classes to first generation low income middle school students in Oakland California Cassidy Puckett has seen firsthand that being good with technology is not something people are born with it's something they learn In *Redefining Geek* she overturns the stereotypes around the digitally savvy and identifies the habits that can help everyone cultivate their inner geek Drawing on observations and interviews with a diverse group of students around the country

Puckett zeroes in on five technology learning habits that enable tech savvy teens to learn new technologies a willingness to try and fail management of frustration and boredom use of models and the abilities to use design logic and identify efficiencies In *Redefining Geek* she shows how to measure and build these habits and she demonstrates how many teens historically marginalized in STEM are already using these habits and would benefit from recognition for their talent access to further learning opportunities and support in career pathways She argues that if we can develop recognize and reward these technological learning habits in all kids especially girls and historically marginalized racial and ethnic groups we can address many educational inequities and disparities in STEM Revealing how being good with technology is not about natural ability but habit and persistence *Redefining Geek* speaks to the ongoing conversation on equity in technology education and argues for a more inclusive technology learning experience for all students

Adaptive Thermal Comfort: Foundations and Analysis

Michael Humphreys, Fergus Nicol, Susan Roaf, 2015-08-27 There has been widespread dissatisfaction with accepted models

for predicting the conditions that people will find thermally comfortable in buildings These models require knowledge about clothing and activity but can give little guidance on how to quantify them in any future situation This has forced designers to make assumptions about people s future behaviour based on very little information and as a result encouraged static design indoor temperatures This book is the second in a three volume set covering all aspects of Adaptive Thermal Comfort The first part narrates the development of the adaptive approach to thermal comfort from its early beginnings in the 1960s It discusses recent work in the field and suggests ways in which it can be developed and modelled Such models can be used to set dynamic interactive standards for thermal comfort which will help overcome the problems inherited from the past The second part of the volume engages with the practical and theoretical problems encountered in field studies and in their statistical analysis providing guidance towards their resolution so that valid conclusions may be drawn from such studies

Building Governance and Climate Change Richard Lorch, Jacques Laubscher, Edwin Hon-wan Chan, Henk Visscher, 2019-10-23 The contribution of buildings to climate change is widely acknowledged This book investigates how building regulatory systems are addressing the current and future effects of climate change and how these systems can be improved After presenting a comprehensive overview of how the current building regulatory system developed some of the inadequacies are identified The largest part of the book examines the potential for innovative policy solutions to address the real world problem of mitigating and adapting buildings to climate change This publication contributes significantly to our understanding of the complexities of long term energy efficiency in buildings This book was originally published as a special issue of the Building Research Information journal

Public Health Practice in Australia Vivian Lin, James Smith, Sally Fawkes, 2020-07-16 Public Health Practice in Australia offers a thorough introduction to what public health practitioners do and the effort involved in improving the health of the public This second edition has been fully revised and updated in line with current policies and practice It highlights common threads that underlie seemingly disparate activities ideas and entities that comprise the organised effort of public health practice The emphasis is on securing and maintaining the conditions in society that enable people to live healthy and fulfilling lives The authors examine the impact of historical social economic environmental and political factors on the health of individuals communities and populations Taking an applied multidisciplinary approach they outline the strategies and tools that public health practitioners use to improve health outcomes identifying infrastructure needs in the workforce public and private sector organisations and in regulation gathering analysing and using health data applying interventions in health policy provision of health services and health promotion Public Health Practice in Australia draws on current international and Australian research and the interwoven case studies make the theories and concepts come alive It is a valuable resource for students and professionals across the health sciences including public health medicine environmental health health promotion health information management and health administration The book is impressive in the completeness clarity and consistency of the material covered and for the

way in which many of the theoretical issues are related to current practice An extremely useful and valuable reference for both students and practitioners alike Thomas Tenkate Environmental Health

Assessing Writing to Support Learning Sandra Murphy, Peggy O'Neill, 2022-11-08 In this book authors Murphy and O'Neill propose a new way forward moving away from high stakes test based writing assessment and the curriculum it generates and toward an approach to assessment that centers on student learning and success Reviewing the landscape of writing assessment and existing research based theories on writing the authors demonstrate how a test based approach to accountability and current practices have undermined effective teaching and learning of writing This book bridges the gap between real world writing that takes place in schools college and careers and the writing that students are asked to do in standardized writing assessments to offer a new ecological approach to writing assessment Murphy and O'Neill's new way forward turns accountability inside out to help teachers understand the role of formative assessments and assessment as inquiry It also brings the outside in by bridging the gap between authentic writing and writing assessment Through these two strands readers learn how assessment systems can be restructured to become better aligned with contemporary understandings of writing and with best practices in teaching With examples of assessments from elementary school through college chapters include guidance on designing assessments to address multiple kinds of writing integrate reading with writing and incorporate digital technology and multimodality Emphasizing the central role that teachers play in systemic reform the authors offer sample assessments developed with intensive teacher involvement that support learning and provide information for the evaluation of programs and schools This book is an essential resource for graduate students instructors scholars and policymakers in writing assessment composition and English education

What Went Wrong George R. Tyler, 2013-07-16 Something has gone seriously wrong with the American economy The American economy has experienced considerable growth in the last 30 years But virtually none of this growth has trickled down to the average American Incomes have been flat since 1985 Inequality has grown and social mobility has dropped dramatically Equally troubling these policies have been devastating to both American productivity and our long term competitiveness Many reasons for these failures have been proposed Globalization Union greed Outsourcing But none of these explanations can address the harsh truth that many countries around the world are dramatically outperforming the U.S. in delivering broad middle class prosperity And this is despite the fact that these countries are more exposed than America to outsourcing and globalization and have much higher levels of union membership In What Went Wrong George R. Tyler a veteran of the World Bank and the Treasury Department takes the reader through an objective and data rich examination of the American experience over the last 30 years He provides a fascinating comparison between the America and the experience of the family capitalism countries Australia Austria Belgium Denmark France Germany the Netherlands and Sweden Over the last 30 years they have outperformed the U.S. economy by the only metric that really matters delivering better lives for their citizens The policies adopted by the family capitalist countries aren't socialist or

foreign They are the same policies that made the U S economy of the 1950s and 1960s the strongest in the world What Went Wrong describes exactly what went wrong with the American economy how countries around the world have avoided these problems and what we need to do to get back on the right track **Adolescent Psychology in Today's World** Michael J. Nakkula, Andrew J. Schneider-Muñoz, 2018-11-02 This groundbreaking three volume set spotlights how conditions around the world are affecting the healthy development of adolescents in their respective environments on all six continents Continually unstable or perpetually poor economic conditions globalization and rapid technological change are just three of the forces affecting a group 1 2 billion strong today a demographic poised to become our world leaders and catalysts in the not too distant future the world s adolescents Led by two editors who have been dedicated to studying adolescent development worldwide for decades this novel collection of works from contributors in more than 40 countries emphasizes how possibilities for healthy mental and physical development are affected by the difficulties youths face in their countries and how these challenges have shaped and are shaping contemporary teenage life today The set comprehensively addresses issues for adolescents across the globe such as the day to day challenges of poverty inadequate education violence or war disease reproductive matters globalization and technological challenges and more while also providing a strengths based focus in the volumes showing how and why some teenagers in each country have surmounted the challenges and forged stronger characters to better their worlds These stories document more than personal victories and their experiences matter to far more than the adolescents themselves In its State of the World s Children 2011 report UNICEF noted that the world community needs to turn its attention to adolescents in need explaining that focusing on this large and potentially powerful group makes economic sense as well as being a necessary step in working towards achieving human justice By addressing the risks challenges and strengths of teenagers as a group in countries worldwide this work serves to break the cycle of poverty violence discrimination and death for adolescents *Resources in Education* ,1981 Environment Reporter ,1979
