High-Stakes Testing R. Murray Thomas, 2005-03-23 The federal government's No Child Left Behind Act has thrust high stakes testing its goals methods and consequences into the educational limelight The four fold purpose of this book is to describe the nature of high stakes testing identify types of collateral damage that have attended the testing programs analyze methods different groups of people have chosen for coping with the damage and suggest lessons to be learned from the high stakes testing experience The six groups of people whose coping strategies are inspected include politicians and their staffs educational administrators and their staffs parents and the public test makers and test administrators teachers and students Importantly the author avoids aligning himself with the test bashing rhetoric of those who oppose high stakes testing especially the No Child Left Behind Act Key features of this outstanding new book include illustrative cases The book offers more than 350 cases of collateral damage from high stakes testing and people's coping strategies as reported in newspapers over the 2002-2004 period background perspectives Part I examines the influence of high stakes testing on 1 what schools teach 2 how student progress is evaluated 3 how achievement standards are set and 4 how test results are used participant responses Part II which is the heart of the book devotes a separate chapter to the coping strategies of each of the major participants in the high stakes testing movement politicians and their staffs educational administrators and their staffs parents and the public test makers and test givers teachers and students summary chapter The last chapter Lessons to Learn offers suggestions for minimizing collateral damage by adopting alternative approaches not used in the creation of our current high stakes testing programs particularly the federal government's No Child Left Behind Act This book is appropriate for any of the following audiences students taking evaluation or administration courses in schools of education inservice administrators and teachers policy makers and those members of the general public who are concerned about the fate of schooling in America

The Dimensions of Time and the Challenge of School Reform Patricia C. Gandara, 2000-01-01 Annotation As the education reform movement matures into its second decade it is clear that many promising efforts have fallen short in their attempts to create real school change One reason for this is that the process of school reform is much more complex than most reformers realized or were willing to acknowledge The Dimensions of Time and the Challenge of School Reform points to another problem the problem of time and its role in both the success and failure of school reform efforts The importance of understanding the role that time plays in both learning and instruction and finding ways to provide time for teachers grappling with change and students learning to accommodate a new language and culture are important themes in this book This book is directed to policymakers and practitioners as well as to academics in that it combines theory with the real world experiences of many who have been active in the school reform movement and who have learned through trial and error how to think about time in innovative

Committee on Education and Labor, 1967 *Competence Assessment in Education* Detlev Leutner, Jens Fleischer, Juliane Grünkorn, Eckhard Klieme, 2017-03-27 This book addresses challenges in the theoretically and empirically adequate assessment of competencies in educational settings It presents the scientific projects of the priority program Competence Models for Assessing Individual Learning Outcomes and Evaluating Educational Processes which focused on competence assessment across disciplines in Germany The six year program coordinated 30 research projects involving experts from the fields of psychology educational science and subject specific didactics The main reference point for all projects is the concept of competencies which are defined as context specific cognitive dispositions that are acquired and needed to successfully cope with certain situations or tasks in specific domains Koeppen et al 2008 p 62 The projects investigate different aspects of competence assessment The primary focus lies on the development of cognitive models of competencies complemented by the construction of psychometric models based on these theoretical models In turn the psychometric models constitute the basis for the construction of instruments for effectively measuring competencies The assessment of competencies plays a key role in optimizing educational processes and improving the effectiveness of educational systems This book contributes to this challenging endeavor by meeting the need for more integrative interdisciplinary research on the structure levels and development of competencies **Roadmap to 5th Grade Math, North Carolina Edition** Princeton Review (Firm), 2002-03-26 If Students Need to Know It It s in This Book This book develops the math skills of 5th graders It fosters skill mastery that helps them succeed both in school and on the North Carolina End of Grade Test TPR Knows the North Carolina End of Grade EOG Test The experts at The Princeton Review have analyzed the North Carolina EOG Test and this book provides the most up to date thoroughly researched practice possible The test is broken down into its individual skills to familiarize students with the test s structure while increasing their overall skill level Get Results TPR knows what it takes to succeed in the classroom and on tests This book includes strategies that are proven to improve student performance TPR provides Content review based on North Carolina standards and objectives Detailed lessons complete with skill specific activities 2 complete practice North Carolina EOG math tests **Indicators of Precollege Education in Science and Mathematics** National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Indicators of Precollege Science and Mathematics Education, 1985-01-01 Many studies point to the inadequacy of precollege education in the United States How can it be improved The development of effective policy requires information on the condition of education and the ability to measure change This book lays out a framework for an efficient monitoring system Key variables include teacher quality and quantity course content instructional time and enrollment and student achievement **International Handbook of Mathematical Learning Difficulties** Annemarie Fritz, Vitor Geraldi Haase, Pekka Räsänen, 2019-01-30 This comprehensive volume provides

teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society

The Stories We Tell Valerie N. Faulkner, Patricia L. Marshall, Lee V. Stiff, 2019-08-29 The Stories We Tell Math Race Bias Opportunity positions educators as professional decision makers whose every day choices are deeply consequential After exploring topics ranging from the early identification of talent the use of demographic characteristics to make academic decisions and the problematic casting of a gap in mathematical performance as about the students themselves the book explores how professional decision making and a more precise use of data can impact mathematical performance outcomes With gentle precision the book analyzes the patterns of practice in place as educators sort children according to perceived needs Through case studies the authors reconfigure the mathematics achievement gap as being about opportunity provided or denied at both the classroom and systemic levels The book has implications for school personnel as well as others curious about how opportunity impacts outcomes and how data is or is not used to make decisions about children Educators who challenge themselves to engage with the possibility of bias and then face the stories we tell ourselves about the race talent development student merit relationship will have the opportunity to write a powerful and equitable story going forward
