Gsm Based Automatic Energy Meter Reading:

Soft Computing for Problem Solving Kedar Nath Das, Jagdish Chand Bansal, Kusum Deep, Atulya K. Nagar, Ponnambalam Pathipooranam, Rani Chinnappa Naidu, 2019-11-27 This two volume book presents the outcomes of the 8th International Conference on Soft Computing for Problem Solving SocProS 2018 This conference was a joint technical collaboration between the Soft Computing Research Society Liverpool Hope University UK and Vellore Institute of Technology India and brought together researchers engineers and practitioners to discuss thought provoking developments and challenges in order to select potential future directions The book highlights the latest advances and innovations in the interdisciplinary areas of soft computing including original research papers on algorithms artificial immune systems artificial neural networks genetic algorithms genetic programming and particle swarm optimization and applications control systems data mining and clustering finance weather forecasting game theory business and forecasting applications It offers a valuable resource for both young and experienced researchers dealing with complex and intricate real world problems that are difficult to solve using traditional methods

Integrated Green Energy Solutions, Volume 1 Milind Shrinivas Dangate, W. S. Sampath, O. V. Gnana Swathika, Sanjeevikumar Padmanaban, 2023-05-12 INTEGRATED GREEN ENERGY SOLUTIONS This first volume in a two volume set presents the state of the art for the concepts practical applications and future of renewable energy and how to move closer to true sustainability Renewable energy supplies are of ever increasing environmental and economic importance in every country worldwide A wide range of renewable energy technologies has been established commercially and recognized as an important set of growth industries for most governments World agencies including the United Nations have extensive programs to encourage these emerging technologies This book will bridge the gap between descriptive reviews and specialized engineering technologies It centers on demonstrating how fundamental physical processes govern renewable energy resources and their applications Although the applications are updated continually the fundamental principles remain the same and this book will provide a useful platform for those advancing the subject and its industries

Integrated Resilient Energy Solutions is a two volume set covering subjects of proven technical and economic importance worldwide Energy supply from renewables is an essential component of every nation s strategy especially when there is responsibility for the environment and sustainability These two volumes will consider the timeless renewable energy technologies principles yet demonstrate modern applications and case studies Whether for the veteran engineer student or other professional these two volumes are a must have for any library

Recent Advances in Engineering – Proceedings of ICRAE 2022 Dr. Mahesh M Bunde, Dr. Rekha Nair, 2023-06-21 The Proceedings of ICRAE deals with innovative ideas different categories of green technologies and sustainable development including renewable energy sources power systems mathematical ecology industrial technologies and construction and material sciences The chapters are written by eminent authors to propose improvement and expansion of processes and applications connected to sustainable development Rapid

urbanisation is proving to have direct consequences on the environment Environmental awareness and protection is one of the challenging issues of new millennia Industrialization and population explosion has opened new frontiers in the conservation of environmental protection Any sustainable development has multifaceted approach encompassing environmental technological social and economic developmental dimensions The selected papers in this book have highlighted issues related to Green Technology and sustainable development and bridge the gap between technological advancement and its impact on the environment

Smart Buildings Digitalization, Two Volume Set O.V. Gnana Swathika,K. Karthikeyan,Sanjeevikumar Padmanaban,2022-05-27 A smart building is the state of art in building with features that facilitates informed decision making based on the available data through smart metering and IoT sensors This set provides useful information for developing smart buildings including significant improvement of energy efficiency implementation of operational improvements and targeting sustainable environment to create an effective customer experience It includes case studies from industrial results which provide cost effective solutions and integrates the digital SCADA solution Describes complete implication of smart buildings via industrial commercial and community platforms Systematically defines energy efficient buildings employing power consumption optimization techniques with inclusion of renewable energy sources Covers data centre and cyber security with excellent data storage features for smart buildings Includes systematic and detailed strategies for building air conditioning and lighting Details smart building security propulsion This set is aimed at graduate students researchers and professionals in building systems architectural and electrical engineering

Smart Buildings Digitalization O.V. Gnana Swathika,K. Karthikeyan,Sanjeevikumar Padmanaban,2022-02-23 This book explains the concept of data centers including data collection public parking systems smart metering and sanitizer dispensers Electric urban transport systems and effective electric distribution in smart cities are discussed as well The extensive role of power electronics in smart building applications such as electric vehicles rooftop terracing and renewable energy integration is included Case studies on automation in smart homes and commercial and official buildings are elaborated This book describes the complete implication of smart buildings via industrial commercial and community platforms

FEATURES Systematically defines energy efficient buildings employing power consumption optimization techniques with the inclusion of renewable energy sources Covers data centers and cybersecurity with excellent data storage features for smart buildings Includes systematic and detailed strategies for building air conditioning and lighting Details smart building security propulsion This book is aimed at graduate students researchers and professionals in building systems engineering architectural engineering and electrical engineering

Emerging Technologies in Computer Engineering: Microservices in Big Data Analytics Arun K.
