

Phlebotomy

"Always **verify** the order to determine what tests will be done & identify the patient"

Process of withdrawing blood from a vein for laboratory testing

Things to review on the order:

- Ordering provide
- Test & test code
- Diagnosis code that correlates with test (ICD-10)
- Special specimen requirements (fasting)
- Patient demographics
- Insurance/ billing information

Completing a **lab requisition** form minimizes costly & dangerous errors

- Provider's order
- Patient identity
- Labeling of specimens
- Identification # of specimens

For test preparation you must ask when the patient last ate or had something to drink. For a **lipid panel** the patient must fast because the test will detect fats from the food they ate.

For **drug tests**, the patient must be asked if they took any medication & the names/ dosages of the drug

Supplies for blood draw:

- Gloves
- Tourniquet
- Alcohol wipes
- Gauze (avoid cotton balls)
- Butterfly needle (for fragile weak veins/ hand draws)
- Double-pointed needle (21-22 gauge)
- Collection tubes
- Labels/ laboratory requisition

"The **LARGER** the gauge # = the **SMALLER** the needle. Typical 21-22 gauge is good. Using the right size is important to prevent hemolysis"
