Home Theatre Building Guide:

Building a Windows HTPC Terry Walsh, 2014-02-02 Building a Windows Home Theatre PC is We Got Served's definitive guide to planning building installing and using a Windows based home theatre PC. If you're serious about streaming and managing your music and movies collection then a Home Theatre PC HTPC puts you firmly in control. Sure you can stream media on Connected TVs, Blu-ray players and other receivers but you have limited opportunities to customise and tailor those offerings to your needs, your family's needs and the needs of your home. Depending on your choice you get these services, miss out on those services and are reliant on a benevolent manufacturer to continue adding new apps and maintaining existing apps. But a HTPC with a small footprint, powerful and silent hardware running slick easy to manage media center software is not a dream. It's available for you today. Right now. You can build the hardware you want, install the services you prefer and play the media you love. In this 513 page guide we walk you step by step through creating a first class small and mighty HTPC. You'll plan the specifications, components and form factor, you need, select the hardware and learn how to assemble a barebones kit such as our reference build, an Intel NUC HTPC or build a PC from scratch. From there we deep dive into maximising performance of your HTPC through tweaking motherboard settings and installing Intel's Rapid Start and Smart Connect management applications. We'll install the latest release of Windows and configure the operating system for HTPC use, tailoring settings to support DTS and Dolby Digital audio, then enhancing video support for Blu-ray disc. With support for Blu-ray on board you'll be guided through advanced topics like region unlocking and DVD Blu-ray ripping to a choice of formats including MKV, BDMV and ISO for streaming in your favourite media center software. We install USB and Network TV Tuners for configuring Live and Recorded TV and use DVLink to integrate our channels and EPG into a variety of popular media applications. If you think we're done then hold on. The guide takes a detailed look at configuring a universal remote control, the Logitech Harmony Hub for use with our HTPC and look at various ways to download and manage music, video and TV metadata for our media collection. You'll learn the basics of popular file downloaders, SABnzbd and uTorrent and we wrap up with a comprehensive review of leading media center packages, Plex Media Server and XBMC. Building a Windows Home Theatre PC is packed with tips, tricks and tutorials to help you build a kick ass home theatre PC that will last you for years to come.

The Complete Guide to Home Theaters Lisa Montgomery, 2015-04-17 You've probably seen home theaters in the pages of home improvement and technology magazines like *Electronic House*. You may have even encountered one at the home of a friend or colleague. Perhaps you've stopped at a home electronics store and have seen a home theater there. Have you ever wondered what it takes to create these elegant high performing A/V masterpieces? Our Complete Guide to Home Theater Planning will walk you through the process step by step. As you'll learn, creating a home theater requires carefully planning to get right some imagination and plenty of time and patience. It's hard work, but the results can be phenomenal—something that pleases every member of your family and adds real value to your house. And here's some really good news: Any room in your house can function admirably as a home theater as long as you design the space correctly and select and install the A/V equipment carefully. This book discusses the pros and cons of the morphing existing rooms into home theaters as well as building a space from the ground up. The appropriate types of equipment for each type of space are suggested and classic mistakes to avoid are divulged. And if being on the cutting edge is important to you, there's a complete chapter dedicated to a discussion about the new audio and video trends that are worth consideration. You can take your theater project a step further by adding features like dimmable lighting, specialty seating, fiber optic star ceilings, and more. Although these amenities will add to your bottom line, they're an effective way to put your own personal stamp on your theater, making it a space that's uniquely yours. We'll introduce you to some of these unique home theaters, both ones that have been designed and installed entirely by the homeowners themselves and ones that have been created by seasoned home systems professionals. You'll gain loads of advice and gather great inspiration for tackling your own home theater project. Good luck and happy home theater building.
