CONSTRUCT A CLADOGRAM

You can think of a cladogram as an evolutionary family tree in which things that are more closely related share more characteristics. As an analogy, processes that have evolved due to new technologies can be organized using cladistics. For this activity, you will fill in a cladogram for methods of transportation.

Procedure

1. Think about the characteristics of the following methods of transportation: **bicycle, car, motorcycle, airplane, and on foot.**
2. Fill in your cladogram by filling in each method of transportation listed in Step 1 on the appropriate line at the top.

Analyze and Conclude

1. What "derived characters" are used in this cladogram?
2. Which mode of transportation may be considered an "outgroup"—a group that has none of the characteristics labeled on the cladogram?
3. A species that has evolved a new trait is not better than a species without that trait. Each species is just adapted to a certain way of life. When might riding a bike have an advantage over flying in an airplane?

CONSTRUCT ANOTHER CLADOGRAM

You are a scientist trying to determine the relationship between the organisms below. Using your knowledge of cladistics create a cladogram that represents how these animals are related. Draw each of the animals illustrated below on a separate sheet of paper to create your cladogram. (OR, you can cut them out and paste them.)

Analyze and Conclude

1. What derived characters did you use in your cladogram?
2. Which organism would be considered to be an "outgroup"? Why?
