# **Basic Cost Management Concepts and Accounting for Mass Customization Operations**

---

### **ANSWERS TO REVIEW QUESTIONS**

- 2-1** Product costs are costs that are associated with manufactured goods until the time period during which the products are sold, when the product costs become expenses. Period costs are expensed during the time period in which they are incurred.
- 2-2** Product costs are also called inventoriable costs because they are assigned to manufactured goods that are inventoried until a later period, when the products are sold. The product costs remain in the Work-in-Process or Finished-Goods Inventory account until the time period when the goods are sold.
- 2-3** The most important difference between a manufacturing firm and a service industry firm, with regard to the classification of costs, is that the goods produced by a manufacturing firm are inventoried, whereas the services produced by a service industry firm are consumed as they are produced. Thus, the costs incurred in manufacturing products are treated as product costs until the period during which the goods are sold. Most of the costs incurred in a service industry firm to produce services are operating expenses that are treated as period costs.
- 2-4** The five types of production processes are as follows:
- **Job shop:** Low production volume; little standardization; one-of-a-kind products. Examples include custom home construction, feature film production, and ship building.
  - **Batch:** Multiple products; low volume. Examples include construction equipment, tractor trailers, and cabin cruisers.
  - **Assembly line:** A few major products; higher volume. Examples include kitchen appliances and automobile assembly.
  - **Mass customization:** High production volume; many standardized components; customized combination of components. An example is the computer industry.

## **Managerial Accounting Hilton 9th Edition Answer Key:**

**Ebook: Managerial Accounting - Global Edition** Ronald Hilton, David Platt, 2014-09-16 We are pleased to present this Global Edition which has been developed specifically to acquaint students of business with the fundamental tools of managerial accounting and to promote their understanding of the dramatic ways in which business is changing. The emphasis is on teaching students to use accounting information to best manage an organization. Each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. There is significant coverage of contemporary topics such as activity based costing, target costing, the value chain, customer profitability analysis and throughput costing while also including traditional topics such as job order costing, budgeting and performance evaluation. Many of the real world examples in the Management Accounting Practice boxes have been revised and updated to make them more current and several new examples have been added. This Global Edition has been adapted to meet the needs of courses outside the United States and does not align with the instructor and student resources available with the U.S. edition.

*Basic Management Accounting for the Hospitality Industry* Michael Chibili, 2019-11-26 Basic Management Accounting for the Hospitality Industry uses a step by step approach to enable students to independently master the field. This second edition contains many new themes and developments including the essence of the International Financial Reporting Standards (IFRS) integration of the changes caused by the evolution of the Uniform System of Accounts for the Lodging Industry (USALI), the extension of price elasticity of demand and addition of income and cross elasticities, the addition of break even time (BET) as an additional method of analysing capital investments. Up to date and comprehensive coverage, this textbook is essential reading for hospitality management students.
