Project(ing) Human: Representations of Disability in Science Fiction Courtney Stanton,2023-05-30 This edited volume examines representations of disability within popular science fiction using examples from television film literature and gaming to explore how the genre of science fiction shapes cultural understanding of disability experience Science fiction texts typically grapple with concepts such as transhumanism embodiment and autonomy more directly than do those of other genres In doing so they raise significant questions about the experience of disability More broadly they often convey the place of disability in not only the future but also the world of today Through critical research the chapters within this

interdisciplinary collection explore what science fiction texts convey about the value of disability whether it be through disabled characters biotechnologies or more broadly conceptions of an idealized future Chapters are grouped thematically and include discussions of the intersections of disability with other identity groups the interplay of disability and market capitalist value and how disability shapes current and future definitions of human ness agency and autonomy This full volume builds on current research regarding the relationship of disability studies to the science fiction genre by exploring new themes and contemporary media to aid as an instructional tool for scholars in fields of disability studies science fiction literature and media studies

Women Who Kill Lenore Walker,David Shapiro,Amanda Temares,Brandi Diaz,2024-10-11 Women rarely kill How and why a woman can be driven to lethal action is often highly complex and misunderstood Many of these women who act lethally are driven to such a point as a last resort following prolonged experiences of child abuse and or domestic violence This book offers insights into these women detailing their motivations their patterns of violence and how they can be aided through psychological evaluation and proper expert testimony The chapters in this volume also include discussions of women who did not kill but were punished as if they had This collection of writings seeks to fill the gaps in research on women who kill This book is beneficial to students and researchers of Psychology including Forensic Psychology It will further aid the field of criminal justice as well as policymakers such that clinicians can provide an enhanced understanding on various psychological and demographic factors which contribute to situations where battered women reach a point where the only option to ensure survival is lethal self defense Finally this book offers clarity as it points out the areas in which the legal system has failed these women The chapters in this book were originally published as a special issue of Journal of Aggression Maltreatment Trauma

Psychosis, Psychiatry and Psychospiritual Considerations Brian Spittles,2022-11-29 A phenomenological and spiritual investigation of anomalous mental experiences From a psychiatric perspective psychosis is generally viewed as a psychopathological and often incomprehensible mental disorder of biological cause In his book Brian Spittles argues that this represents a rather limited view and that a psychospiritual investigation of psychosis may enable a better understanding of its nature and determinants His aim is not to negate the discipline of psychiatry but to demonstrate the viability and efficacy of incorporating psychospiritual considerations into psychosis research Within these pages Spittles challenges several core psychiatric beliefs and calls for the discipline to extend its investigative parameters beyond the limited epistemological bounds of materialism The book uses an open ended heuristic approach that enables the systematic examination and critical appraisal of views on psychosis across the materialist to metaphysical spectrum This is structured in four Focal Settings that sequentially examine the construal of psychosis within different paradigms of psychospiritual understanding which provide a

historical overview of evolving understandings of psychosis within the tradition of psychiatry in which psychospiritual matters are generally not considered

The Good Drone Kristin Sandvik, Maria Jumbert, 2016-08-25 While the military use of drones has been the subject of much scrutiny the use of drones for humanitarian purposes has so far received little attention As the starting point for this study it is argued that the prospect of using drones for humanitarian and other life saving activities has produced an alternative discourse on drones dedicated to developing and publicizing the endless possibilities that drones have for doing good Furthermore it is suggested that the Good Drone narrative has been appropriated back into the drone warfare discourse as a strategy to make war more human This book explores the role of the Good Drone as an organizing narrative for political projects technology development and humanitarian action Its contribution to the debate is to take stock of the multiple logics and rationales according to which drones are good with a primary objective to initiate a critical conversation about the political currency of good This study recognizes the many possibilities for the use of drones and takes these possibilities seriously by critically examining the difference the drones functionalities can make but also what difference the presence of drones themselves as unmanned and flying objects make Discussed and analysed are the implications for the drone industry user communities and the areas of crisis where drones are deployed
