Database: Enterprise, Skills and Innovation Mike Jackson, David Nelson, Sue Stirk, 2005-06-16 The British National Conference on Databases BNCOD was established in 1980 as a forum for research into the theory and practice of databases The original conference in the series took place at the University of Aberdeen To be precise this conference was in fact entitled ICOD which stood for International Conference on Databases It was the intention when the series began that an ICOD would take place every two years whilst a BNCOD would run in the years in between As the record shows ICOD was only held in 1980 and 1983 The more junior conference has managed to acquire a lifetime much longer than that of its senior relative If truth were known however BNCOD has over the years grown into ICOD and although the conference is still titled British National it is in fact an international conference that takes place on a yearly basis Proof of this can be obtained simply by looking at the table of contents of these proceedings which clearly show that the majority of papers presented at this year's conference came from contributors whose affiliations are outside the UK Despite the range of papers on offer BNCOD still retains its uniquely British flavor The Programme Committee is drawn from UK academics and the conference is always held at a British university or in earlier years a polytechnic

Electronic Government David L. McClure, 2002-07 Reviews the status of XML technology and the challenges the Fed gov't faces in implementing it XML is a flexible nonproprietary set

of standards designed to facilitate the exchange of information among disparate computer systems using the Internet's protocols. Specifically, it assesses 1) the overall development status of XML standards to determine whether they are ready for governmentwide use and 2) challenges faced by the federal government in optimizing its adoption of XML technology to promote broad information sharing and systems interoperability. The report recommends that the OMB take steps to improve the federal government's planning for adoption of XML.
