**The Transnationalized Social Question** Thomas Faist, 2019 The social question is back Yet today's social question is not primarily between labour and capital as it was in the nineteenth century and throughout much of the twentieth The contemporary social question is located at the interstices between the global South and the global North It finds its expression in movements of people seeking a better life or fleeing unsustainable social political economic and ecological conditions It is transnationalized not only because migrants and their significant others entertain ties across the borders of national states staying in touch with family and friends receiving or sending financial remittances in transnational social spaces Also of importance are cross border recruitment schemes for workers and the cross border diffusion of norms appealed to in the case of migration for example the social right to decent work as a human right Moreover migration can become an issue of inclusion or exclusion in fields important to life chances in the emigration transit or immigration states a transnationalization of national states And as in the nineteenth century political conflicts arise constituting the social question as a public concern In earlier periods class differences dominated conflicts While class has always been criss crossed by manifold heterogeneities not least of all cultural ones around ethnicity religion and language it is these latter heterogeneities that have sharpened in situations of immigration and emigration over the past decades Casting a wide net in terms of conceptual and empirical scope this book tackles both the social structure and the politics of social inequalities It sets a comprehensive agenda for research which also includes the public role of social scientists in dealing with the transnationalized social question

**The Internationalisation of the Labour Question** Stefano Bellucci,Holger Weiss,2019-11-26 This edited collection is a  
global history of workers organisations since 1919 the year when the International Labour Organisation ILO the Comintern  
and the International Federation of Trade Unions were formed This historical moment represents a caesura in labour history  
as it epitomises the beginning of what the editors and the contributors in this book call the internationalisation of the labour  
question The case studies in this centenary volume analyse the relationship between global workers organisations and the  
new ideological confrontation between liberal capitalism socialism and communism since the Bolshevik Revolution in Russia  
Workers organisations trade unions in particular grew in importance and managed to organise internationally forming  
alliances cemented by ideology and sustained by international institutional bodies or centrals In the nascent capitalist versus  
communist struggle trade unions thrived Is it mere coincidence that today s decline of unionism coincides with the end of

ideological antagonism This book emphasises important global labour issues such as gender as well as international workers histories from Latin America Asia and Africa
