Helping Your Child Learn Math Patsy F. Kanter, Linda B. Darby, 1999 **Resources in Education**, 2001 Teaching Mathematics Today 2nd Edition Erin Lehmann, 2015-04-01 This second edition is a must read for today's mathematics teachers offering research based strategies and best practices that are critical and highly effective in mathematics instruction This invaluable resource provides practical suggestions resources and templates to support the areas of classroom management instructional planning content and practice standard implementation assessment and differentiation as well as methods to build students conceptual understanding It also guides teachers in using the Professional Learning Community model effectively in order to support professional growth and student achievement With a focus on student thinking and learning this book is an essential guide for all educators **Homeschool Your Child for Free** LauraMaery Gold, Joan M. Zielinski, 2009-08-04 Provide a solid education at home without breaking the bank Introduced in 2000 Homeschool Your Child for Free gave countless parents the plan and peace of mind to get their kids education on the right track Now authors LauraMaery Gold and Joan M Zielinski have revised and updated their popular guide offering their expert homeschooling advice and information plus new tools and resources to help you and your child succeed Complete curriculum plans for a comprehensive education from preschool through high school Where to find free online courses NEW Ways to partner with public schools NEW Legal guidelines and compliance requirements for home educators Keys to graduating a homeschooler NEW Developing personal finance management and life skills NEW Teaching tips and motivators from successful homeschoolers Career and vocational guidance NEW And so much more Comprehensive and clear Homeschool Your Child for Free gives you access to free instructional material from reading readiness activities for preschoolers to science projects for teens to help build a strong foundation that will last into adulthood You don't need to drain your bank account to guarantee a good education for your child With a computer and the Internet you have the largest library and laboratory right at your fingertips all for free **Developing Mathematical Reasoning** Pamela Weber Harris, 2025-02-18 Math is not rote memorizable Math is not random guessable Math is figure out able Author Pam Harris argues that teaching real math math that is free of distortions will reach more students more effectively and result in deeper understanding and longer retention This book is about teaching undistorted math using the kinds of mental reasoning that mathematicians do Memorization tricks and algorithms meant to make math easier are full of traps that sacrifice long term student growth for short lived gains Students and teachers alike have been led to believe that they've learned more and more math but in reality their brains never get any stronger Using these tricks may make facts easier to memorize in isolation but that very disconnect distorts the reality of math The mountain of trivia piles up until students hit a breaking point Humanity's most powerful system of understanding organizing and making an impact on the world becomes a soul draining exercise in confusion chaos and lost opportunities Developing Mathematical Reasoning Avoiding the Trap of Algorithms emphasizes the

importance of teaching students increasingly sophisticated mathematical reasoning and understanding underlying concepts rather than relying on a set rule for solving problems This book illuminates a hierarchy of mathematical reasoning to help teachers guide students through various domains of math development from basic counting and adding to more complex proportional and functional reasoning Everyone is capable of understanding and doing real math This book Highlights the important mathematical relationships strategies and models for students to develop Offers personal stories reflection sections and extensive practical exercises for easy implementation Includes real math a lot of it to provide teachers with examples they can put to use in their classrooms immediately This book is a valuable resource for educators looking to reach more students by building a strong foundation of mathematical thinking in their students By addressing common misconceptions about math and providing practical strategies for teaching real math this book shows that everyone can use the mathematical relationships they already know to reason about new relationships In other words everyone can math

What African American Parents Want Educators to Know Gail L. Thompson, 2003-05-30 Thompson designed an empirical study to gather feedback from African American parents on numerous issues pertaining to their children's schooling experiences The results discussed in this book can be utilized to improve the schooling experiences of African American children nationwide The African American parents/guardians who participated in this study were biological parents in two parent homes single parents grandparents foster parents and stepparents who were rearing school age children Some had been deterred from completing their own formal education as a result of peer pressure temptation outside of school or stressful circumstances Others had positive schooling experiences and stable childhoods Regardless of the differences in their background experiences the majority of these parents or guardians were single minded about wanting a better life for their children believing that a good K 12 education and college education were crucial to their children's advancement And while most believed resolutely in the hope offered by the public school system they recognized that schools couldn't do it all African American parents and guardians are willing to work with teachers and administrators to ensure that their children receive a quality education Yet if the historic achievement gap is ever to be eradicated teachers administrators researchers and policymakers must be more willing to view African American parents/guardians as assets African American parents/guardians must be invited to verbalize their concerns and those concerns must be taken seriously to effect meaningful and lasting change in the public school system
