The hydraulic system of these tractors are composed of the main components as shown in the figure.

- To raise and lower the implement connected to the three point hitch. For this motion, the position control valve and the linkage installed on the hydraulic cylinder body provide three different applications : position control, draft control and mix control.
- Take out hydraulic power from the hydraulic cylinder body to operate an implement's hydraulic actuator.
- Take out hydraulic power from the quick couplers for the implements with either single acting or double acting actuators. In this case, the implement's cylinders can be actuated by operating the auxiliary control valves.
