 Introduction to Experimental Methods succinctly explains fundamental engineering concepts in mechanics dynamics heat  
 transfer and fluid dynamics From conceptualizing an engineering experiment to conducting a comprehensive lab this book  
 enables students to work through the entire experimental design process Offering a complete overview of instruction for  
 engineering lab methodology the book includes practical lab manuals for student use directly complementing the instruction  
 Numerous worked examples and problems are presented along with several hands on experiments in individual lab manuals  
 This book discusses how to write lab reports how to configure a variety of instruments and equipment and how to work  
 through failures in experimentation Introduction to Experimental Methods is intended for senior undergraduate engineering  
 students taking courses in Experimental Methods Instructors will be able to utilize a Solutions Manual for their course  
 Features Provides an overview of experimental methods in mechanics dynamics heat transfer and fluid dynamics Covers

 Combination of learning services and technology to provide high value integrated learning anytime and anyplace GOLE aims  
 to create a virtual learning simulator that is capable of customizing the pedagogy to the learners learning style To properly  
 design learn by doing scenarios the learning environment must balance the learning objectives with authenticity The key is to  
 build a realistic environment which is complex enough to promote expectation failure and robust enough to support the  
 learner at that point Two of the major learning objectives for a goal oriented learning environment are the application of  
 facts and building specific skills The purpose of this research was to design develop implement and assess a Goal Oriented  
 Learning Environment GOLE into the Civil and Environmental Engineering curriculum at Lehigh University Also to design  
 develop implement and assess Internet based instructional systems into the CEE curriculum To achieve these objectives a  
 GOLE was implemented into two courses that were used as case studies in this research These case studies describe the

instructional design method utilized and the assessment involved to evaluate the courses The instructional design method utilized nine steps Discuss Determine Decide Design Develop Implement Assessment Evaluation and Evolve The designing of GOLE focused on content delivery platform character development and story line In order to assess and evaluate the GOLE a series of five evaluations were created in order perform the analysis skill matrix course performance website evaluations and the DISC profile The data was then analyzed to determine what parts of the course were effective
