Burton, Harcourt Brace, 1998-05-22 *Models of Applied Research in Educational Technology* Virginia Pilato, Barbara Schwartz-Bechet, Katherine Woodward, Help Your Kids with Math Barry Lewis, 2010-06-21 Studying math is often a source of great anxiety for children and teenagers. It also proves troublesome for parents as many are reminded of their own struggles with the subject and feel lost when trying to tackle it again years later in an effort to aid their offspring. Help Your Kids with Math is designed to reduce the stress of studying math for both children and adults. Using an appealing and uniquely accessible illustrative style, this book will show you what others only tell you, covering everything from basic arithmetic to more challenging subjects such as statistics, geometry, and algebra. Every aspect of math is explained in easily understandable language so that adults and kids can deal with the subject together. Tricky concepts are explored and examined step by step so that even the most math-phobic individual will be able to approach complex problems with confidence. The first in an original new series of study aids that aims to demystify those subjects that seem tricky and incomprehensible, Math Survival provides invaluable guidance and easy explanations for all those desperate kids and parents who need to understand math and put it into practice.

Detroit School Reform in Comparative Contexts Edward St. John, Feven Girmay, 2019-07-08 This book critically examines how the narrative of global economic competition was used to rationalize college preparatory curriculum for all high school students and promote charter schools in Detroit. Using mixed qualitative and quantitative methods, the study identifies neighborhood risk factors undermining students' academic success along with the positive effects of churches and service centers as mitigating forces. The authors focus on a range of topics and issues including market competition, urban decline, community resources, testing and accountability, smaller schools, and engaged learning. The volume illustrates how action studies by engaged scholars working with community activists empowers students to overcome emerging barriers.
