Survival of the Fittest (Those Who Can Read a Topographic Map)

Section _____

Date _____

You and a friend are near the northeast corner of an island at the spot indicated on the map. There are a lighthouse keeper and his family living on the opposite side of the island. Unfortunately, the lighthouse is broken during the crash, and your cell phones don't work. The only way to survive is to walk to the lighthouse. You are injured in the crash and can't climb higher than 75 feet or swim across the water. The water is too deep and carries enough water to last 3 days. It gets worse: the water is too shallow, there's a high wave, and the jungle is filled with snakes, tigers, and lions. The good news is that you have a topographic map showing these hazards. You have figured out exactly where the plane crashed, and the map also shows a well where you can refill your canteens—if you can get there in 7 days.
