they're in the hands of photographers, commercial surveyors and racers alike. This fully illustrated book explains how drones developed, where they're going and which one you should choose. It even includes complete instructions to build both a simple drone and a super fast FPV racer yourself. Whether you're flying indoors or out, buying or building, this book covers everything. Understand the Jargon: Flying has a lot of unfamiliar terminology, but this book will make it easy to master. Business or Pleasure: Every type of multicopter you might want is introduced, including explanations of which is best suited for what role. Get the Best Pictures: This edition includes an extended guide to the tech and composition tricks you can use to make your pictures stand out of the pack. Get the Best Video: A new shot guide shows you how to get the most engaging aerial video, whatever your drone. Be a Winning FPV Racer: There are two complete step-by-step instructions for building your own drones: inside an FPV racer or a surprisingly cheap wooden drone, both great projects. Following the worldwide success of the first edition, which has been translated into numerous languages, this second edition is not only fully updated to keep pace with the laws and technology, but also extended to thoroughly cover the fast-growing new sport of FPV drone racing, while still including a comprehensive guide to learning to fly any drone.

**Information Systems** Marinos Themistocleous, Maria Papadaki, 2020-04-17. This book constitutes selected papers from the 16th European Mediterranean and Middle Eastern Conference EMCIS 2019 held in Dubai, UAE, in October 2019. The 48 full papers presented in this volume were carefully reviewed and selected from a total of 138 submissions. They were organized in topical sections named: Big Data and Analytics, Blockchain Technology and Applications, Cloud Computing, Digital Services and Social Media, e-Government, Enterprise Information Systems, Health Care Information Systems, Information Systems Security and Information Privacy Protection, Innovative Research Projects, IT Governance and Management, and Organizational Issues in Information Systems.

**Conservation Drones** Serge A. Wich, Lian Pin Koh, 2018-05-31. Increasing numbers of ecologists and conservation biologists have begun to explore the use of drone technology to obtain accurate and up-to-date data on the distribution and density of species, as well as the threats to their habitats, in their ongoing attempts to conserve and monitor biodiversity. Conservation drones are low-cost, autonomous and operator-friendly unmanned aerial vehicles that can be used for surveying, mapping and monitoring both habitat and biodiversity. They are fast becoming a valuable complement to ground-based surveys and satellite imagery for a wide range of ecological and conservation applications. The authors pioneered the use of conservation drones for the purpose of monitoring orangutan populations in Southeast Asia. They subsequently founded ConservationDrones.org to share their knowledge of building and using drones with colleagues in the wider environmental community. This website has proved highly popular, and this book aims to further build capacity to use drones and inspire others to adapt emerging technologies for practical conservation.
