Architectural Graphic Standards The American Institute of Architects, 2007-03-30 Since 1932 the ten editions of Architectural Graphic Standards have been referred to as the architect's bible From site excavation to structures to roofs this book is the first place to look when an architect is confronted with a question about building design With more than 8 000 architectural illustrations including both reference drawings and constructible architectural details this book provides an easily accessible graphic reference for highly visual professionals To celebrate seventy five years as the cornerstone of an industry this

commemorative Eleventh Edition is the most thorough and significant revision of Architectural Graphic Standards in a generation. Substantially revised to be even more relevant to today's design professionals, it features an entirely new innovative look and design created by Bruce Mau Design that includes a modern page layout, bold second color, and new typeface. Better organized, a completely new organization structure applies the UniFormat classification system, which organizes content by function rather than product or material. Expanded and updated coverage of inclusive universal and accessible design strategies. Environmentally sensitive and sustainable design is presented and woven throughout, including green materials, LEEDS standards, and recyclability. A bold contemporary new package as impressive as it is open. The Eleventh Edition features a beveled metal plate set in a sleek black cloth cover. Ribbon Markers included as a convenient and helpful way to mark favorite and well-used spots in the book. All New material. Thoroughly reviewed and edited by hundreds of building science experts and experienced architects. All new details and content, including new structural technologies, building systems, and materials. Emphasis on sustainable construction, green materials, LEED standards, and recyclability. Expanded and updated coverage on inclusive universal and accessible design strategies, computing technologies, including Building Information Modeling (BIM) and CAD/CAM, new information on regional and international variations, accessibility requirements keyed throughout the text, new standards for conducting, disseminating, and applying architectural research. New and improved details. With some 8,500 architectural illustrations, including both reference drawings and constructible architectural details, Architectural Graphic Standards continues to be the industry's leading, easily accessible graphic reference for highly visual professionals.

Operational guidelines for the design, implementation and harmonization of monitoring and evaluation systems for climate-smart agriculture

Food and Agriculture Organization of the United Nations, 2019-09-24. Monitoring and evaluation (M&E) is recognized as critically important for tracking progress, whether it serves the purpose of accountability to donors, informs future improvements to CSA practices, or contributes to the aggregate global progress toward meeting the SDGs or the global stocktake under the Paris Agreement. There has been a growing chorus acknowledging the need to align the indicators and M&E frameworks of major donors with those of the three global agreements. Monitoring and reporting has begun on the SDGs, although the development of methodologies for various indicators is an evolving process. The development of specific indicators for the agriculture sector is also well underway for the Sendai Framework. The organizations conducting this work have recognized the need to streamline these processes. For example, they have already attempted to align several of the indicators between the SDGs and the Sendai Framework. These operational guidelines aim to address the core constraints and needs of FAO Member States on both the design and implementation of M&E systems that can simultaneously address CSA and sector reporting requirements for the 2030 Agenda, the Sendai Framework, and the UNFCCC Paris Agreement. First and foremost, the guidelines acknowledge the principal need expressed by Member States that M&E systems and indicators be simple and not onerous. The

challenges that have always existed with regard to M E for CSA are still present and are particularly pronounced for pillar 2 adaptation and resilience These challenges to the development of indicators for pillar 2 have exhibited the greatest need for attention
