

Interpreting Graphs Worksheet Answer Key

1. Given the graph below, answer the following questions:

- a. What is the independent variable for this graph?

The independent variable is the number of chapters.

- b. What is the dependent variable for this graph?

The dependent variable is the numbers of typos found.

- c. What can you assume about the relationship between number of chapters in a book and the amount of typos found?

Based on the graph's trend, I can assume that as the number of chapters in a book increases, the number of typos found in the book also increases.

- d. About how many typos would you assume to be in a book with 10 chapters?

Based on the graph, I would estimate about 13 typos in a book with 10 chapters.

2. Given the graph below, answer the following questions:

- a. What is the independent variable for this graph?

The independent variable is height.

- b. What is the dependent variable for this graph?

The dependent variable is weight.

- c. Write a two-sentence explanation for what the graph is attempting to describe.

The graph describes the relationship between a person's height and a person's weight. The graph's trend shows that taller people tend to be heavier, while shorter people tend to weigh less.

- d. Assume that the increments for weight are 20 pounds, starting with 50 pounds, and the height increment is by 5 inches, starting with 50 inches. What would you expect a person to weigh if s/he was 80 inches tall?

Based on the graph, I would assume that a person that is 80 inches tall would weigh about 220-230 pounds.

- e. Draw a line on the graph that you believe represents the best fit for weight and height.

Making Sense of Data and Information Elearn, 2013-06-17 Managers need to be able to make sense of data and to use it selectively to answer key questions Why has quality fallen in the last week Should we subcontract or employ more people What will consumer demand be in the future They need to be able to assess the value of data and to detect what is and what isn't spin The focus is on analysing numbers On their own figures tell us very little To become meaningful they need to be processed and analysed and it is the patterns that emerge from this that provide the information that is needed for decision making The book is arranged in four themes It starts by considering the value of information in organisations and by assessing how effectively the information is used in a management role It then goes on to look at different options for presenting figures so that trends become clearer and patterns simpler to spot As well as making data easier to interpret the techniques the book presents are valuable communication tools that will help the reader use information more effectively with others The last two themes then provide a toolkit of techniques that you can use to investigate situations and help solve problems These include statistical and operational techniques as well as computer tools Like any toolkit the key to using it properly lies in knowing not only what each tool does but when to use it This book will help the reader to develop this ability by applying the methods that are described within a business context *Managing and Mining Graph Data* Charu C.

The Julius Petersen Graph Theory Centennial L.D. Andersen, J. Bang-Jensen, T.R. Jensen, L.K. Jørgensen, G. Sabidussi, C. Thomassen, B. Toft, P.D. Vestergaard, 2016-06-06 Julius Petersen's paper Die Theorie der regulären graphs in Acta Mathematica volume 15 1891 stands at the beginning of graph theory as we know it today The Danish group of graph theorists decided in 1985 to mark the 150th birthday of Petersen in 1989 as well as the centennial of his paper It was felt that the occasion called for a presentation of Petersen's famous paper in its historical context and in a wider sense of Petersen's life and work as a whole However the readily available information about Julius Petersen amounted to very little not even a full bibliography existed and virtually nothing was known about the circumstances that led him to write his famous paper The study of Petersen's life and work has resulted in several papers in particular a biography a bibliography an annotated edition of the letters surrounding Petersen's paper of 1891 an analysis of Petersen's paper and an annotated edition of parts of Petersen's correspondence with Sylow on Galois theory The first four of these papers together with a survey of matching theory form the first part of this book In addition to these five special papers there are papers submitted in the celebration of the Petersen centennial
