Selling,2016 Traditionally Catholic moral theology has been based upon an approach that over emphasized the role of normative ethics and subsequently associated moral responsibility with following or disobeying moral rules Reframing Catholic Theological Ethics offers an alternative ethical method which without destroying any of the valuable insights of normative ethics reorients the discipline to consider human motivation and intention before investigating behavioral options for realizing one s end Evidence from the New Testament warrants the formation of a teleological method for theological ethics which is further elaborated in the approach taken by Thomas Aquinas Unfortunately the insights of the latter were misinterpreted at the time of the counter reformation Joseph A Selling s analysis of moral theological textbooks demonstrates the entrenchment of a normative method aimed at identifying sins in service to the practice of sacramental confession With a firm basis in the teaching of Vatican II the human person integrally and adequately considered provides the fundamental criterion for approaching ethical issues in the contemporary world The perspective then turns to the crucial question of describing the ends or goals of ethical living by providing a fresh approach to the concept of virtue Selling concludes with suggestions about how to combine normative ethics with this alternative method in theological ethics that begins with the actual ethical orientation of the human person toward virtuous living      *The Praeger Handbook of Veterans' Health* Thomas W.
