Multi-club meet-up shows off prototype scenes

by Steve Williams

This year's "unconventional convention" in Sacramento showcased many leading-edge trends in model railroading. Among these was Free-moN (see sidebar), making a first appearance at the NMRA National Convention and National Train Show (NTS).

(Lower photo) Joel Priest manning the rear-end helpers on a 45-car unit coal train across Steve Beals' multi-section module of the prototype UP viaduct-style bridge. The bridge is scratchbuilt with no compression. Steve Williams photo.

The N-Land Pacific modular group (www.nlandpacific.com) from the Upland/Ontario area in Southern California and Silicon Valley Free-moN (www.sv-free-mon.org) from the San Jose, CA area joined forces. Bringing their modules together demonstrated that two groups separated by several hundred miles can agree to a standard and build modules that will meet "faceplate to faceplate" for the first time with flawless track joints and simple electrical hookup.

Modules as LDEs

There are no restrictions on what one may build between the module's end plates. There is even provision for building modules with a change of elevation. This flexibility of the Free-moN standard encourages modelers to faithfully model prototype scenes.

For example, Steve Beals of the N-Land Pacific group has built a detailed model of Union Pacific's viaduct over the Santa Ana River in Riverside, CA along with the adjoining inter-modal transfer yard/park scene (photos this page). The bridge itself is modeled with no compression, and spans nearly six feet.

This is a beautiful example of what the combination of N scale and Free-mo can provide. This scene is nearly twenty feet long, and while it is built in several movable subsections to allow it to fit in Steve's SUV, it is technically just a single Free-moN module. Only at the outer end plates does the trackwork comply with the standard single-track Free-moN interface.

Steve brought with him a couple of other modules as well: a corner module with a scene of an abandoned rail-served building, and an operational wye module with interlocking tower and superb desert scenery.

Dave Falkenburg brought four modules based on scenes in the San Jose area. His Alviso Slough module models a bridge on the former SP mainline between San Jose and Fremont, CA. The other modules will eventually have a highway overpass, a spur for the San Jose Water Company, and the SP's former Agnew,
