WHAT IS NEW?

This implementation manual provides concrete steps for public health authorities and stakeholders to implement at national scale the Emergency Obstetric and Newborn Care (EmONC) framework developed in 2009 by WHO, UNFPA, UNICEF, and the University of Columbia (AMDD). It aims to respond to the need of accelerating progress in the quality of EmONC, which is a key component of primary healthcare. The manual proposes:

- **A participatory and 'bottom-up' health system redesign approach for maternal and newborn health** to improve quality of care in a selected number of EmONC (referral) health facilities, while ensuring their access by the majority of the population within two hours of travel time (from home)
- **New programmatic approaches to strengthen routine data collection and use** to improve quality of care
- **New indicators** for measuring the population able to physically access EmONC services
- **Guidance for the role, infrastructure, and resources for basic EmONC health facilities (BEmONC)**
- **The use of EmONC health facilities as platforms for the integration of Sexual and Reproductive Health (SRH) services**

- **Standards for the minimum number of midwives required in an EmONC health facility** to provide services 24h/7d and on the maximum number of deliveries per midwife per month
- **Qualitative analysis of referral links** between basic and comprehensive EmONC health facilities.
