

# 3rd Grade Math Lesson Plan Unit MLP CCSS 3 NBT Lesson 2

Teacher: \_\_\_\_\_ Dates: \_\_\_\_\_

✓	<b>CCSS 3RD GRADE Math: OPERATIONS and ALGEBRAIC THINKING or OA</b>	
	Represent and solve problems involving multiplication and division.	
	3.OA	Basics (Not expressly covered below, but these skills are required to master OA)
	3.OA.A.1	Interpret products of whole numbers, e.g., interpret $5 \times 7$ as the total number of objects in 5 groups of 7 objects each. For example, describe a context in which a total number of objects can be expressed as $5 \times 7$ .
	3.OA.A.2	Interpret whole-number quotients of whole numbers, e.g., interpret $56 \div 8$ as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each. For example, describe a context in which a number of shares or a number of groups can be expressed as $56 \div 8$ .
	3.OA.A.3	Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem. <sup>1</sup>
	3.OA.A.4	Determine the unknown whole number in a multiplication or division equation relating three whole numbers. For example, determine the unknown number that makes the equation true in each of the equations $8 \times ? = 48$ , $5 = \underline{\quad} \div 3$ , $6 \times 6 = ?$
	Understand properties of multiplication and the relationship between multiplication and division.	
	3.OA.B.5	Apply properties of operations as strategies to multiply and divide. <sup>2</sup> Examples: If $6 \times 4 = 24$ is known, then $4 \times 6 = 24$ is also known. (Commutative property of multiplication.) $3 \times 5 \times 2$ can be found by $3 \times 5 = 15$ , then $15 \times 2 = 30$ , or by $5 \times 2 = 10$ , then $3 \times 10 = 30$ . (Associative property of multiplication.) Knowing that $8 \times 5 = 40$ and $5 \times 2 = 10$ , one can find $8 \times 7$ as $8 \times (5 + 2) = (8 \times 5) + (8 \times 2) = 40 + 16 = 56$ . (Distributive property.)
	3.OA.B.6	Understand division as an unknown-factor problem. For example, find $32 \div 8$ by finding the number that makes 32 when multiplied by 8.
	Multiply and divide within 100.	
	3.OA.C.7	Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that $3 \times 5 = 40$ , one knows $40 \div 5 = 8$ ) or properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers.
	Solve problems involving the four operations, and identify and explain patterns in arithmetic.	
	3.OA.D.8	Solve two-step word problems using the four operations. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding. <sup>3</sup>
	3.OA.D.9	Identify arithmetic patterns (including patterns in the addition table or multiplication table), and explain them using properties of operations. For example, observe that 4 times a number is always even, and explain why 4 times a number can be decomposed into two equal addends.
✓	<b>CCSS 3RD GRADE Math: NUMBER and OPERATIONS in BASE TEN or NBT</b>	
	Use place value understanding and properties of operations to perform multi-digit arithmetic. <sup>1</sup>	
✓	3.NBT	Basics (Not expressly covered below, but these skills are required to master NBT)
	3.NBT.A.1	Use place value understanding to round whole numbers to the nearest 10 or 100.
	3.NBT.A.2	Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.
	3.NBT.A.3	Multiply one-digit whole numbers by multiples of 10 in the range 10–90 (e.g., $9 \times 80$ , $5 \times 60$ ) using strategies based on place value and properties of operations.

# Math Lesson Plans For Third Grade

**Albert A Gayle**

## **Math Lesson Plans For Third Grade:**

Thank you categorically much for downloading **Math Lesson Plans For Third Grade**. Maybe you have knowledge that, people have seen numerous periods for their favorite books past this Math Lesson Plans For Third Grade, but stop going on in harmful downloads.

Rather than enjoying a fine eBook taking into account a cup of coffee in the afternoon, then again they juggled similar to some harmful virus inside their computer. **Math Lesson Plans For Third Grade** is manageable in our digital library as an online entry to it is set as public in view of that you can download it instantly. Our digital library saves in combination countries, allowing you to get the most less latency era to download any of our books later than this one. Merely said, the Math Lesson Plans For Third Grade is universally compatible bearing in mind any devices to read.
