An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

Perspectives on Assessment and Evaluation in International Schools Jeff Thompson, Mary Hayden, 2018-07-30 Assessment and evaluation are two concepts at the core of schooling which are also central to other forms of education worldwide In an international context assessment and evaluation data are increasingly widely used for accountability and quality assurance purposes at individual student institutional national and global levels This book does not attempt to include consideration of all the issues that could possibly be covered in a title that addresses assessment and evaluation in education internationally Nor has it set out to cover the myriad technical issues with which assessment and evaluation are inevitably concerned Rather a number of authors working within different contexts of international education whether as teachers or leaders in international schools administrators in international examination bodies or researchers in international educational research organisations have been invited to share ideas arising from their own experiences of what might be interpreted as assessment or evaluation be that assessment of student achievement evaluation of teacher effectiveness or evaluation of school quality The international dimension presents a range of challenges to those with responsibility for implementing assessment and evaluation strategies in widely diverse linguistic cultural social and personal contexts and in this book valuable contributions are shared by colleagues who are authorities in the field It is their personal views on assessment and evaluation derived from professional practice in the international sphere that have been brought together here

Meyers,Tiffany S. Aaron,Dallas Hambrick Hitt,2025-09-10 This course book is designed to empower educational leaders to make effective leadership decisions and take successful action in response to dynamic scenarios in their schools and districts This insightful book presents real cases from successful school leaders and the district leaders who supported them that strategically navigated their way through change processes Topics include culturally responsive leadership leading for SEL championing data use improving instruction crisis leadership and more Designed for aspiring educational leaders in leadership preparation programs this book is full of guiding questions tools and practical activities to help deepen learning and translate student understanding to strategic change in their own school contexts **The Knowledge Gap** Natalie Wexler,2020-08-04 Essential reading for teachers education administrators and policymakers alike STARRED Library Journal The untold story of the root cause of America s education crisis It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country s frustrating lack of progress when it comes to providing every child with a quality education The problem wasn t one of the usual scapegoats lazy teachers shoddy facilities lack of accountability It was something no one was talking about the elementary school curriculum s intense focus on decontextualized reading comprehension skills at the expense of actual knowledge In the tradition of Dale Russakoff s The Prize and Dana Goldstein s The Teacher Wars Wexler brings together history research and compelling characters to pull back the curtain on this fundamental flaw in our education system one that fellow reformers journalists and policymakers have long overlooked and of which the general public including many

parents remains unaware But The Knowledge Gap isn't just a story of what schools have gotten so wrong it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed If we truly want to fix our education system and unlock the potential of our neediest children we have no choice but to pay attention Contemporary Curriculum John D. McNeil, 2014-11-17 The Eighth Edition of Contemporary Curriculum In Thought and Action prepares readers to participate in the discussion of curriculum control and other matters important to K 12 and university educators The text highlights major philosophies and principles examines conflicting conceptions of curriculum and provides the intellectual and technical tools educators and administrators need for constructing and implementing curriculum
