Students should be encouraged to write something positive. (Again, this does not mean that students should be encouraged to write that the world is great, or that the system is good. The idea here is to build trust and goodwill. Student perspectives were also offered on a top official in the Federal Reserve Bank of New York last week. That article recently played the entire column.)

Although the short-circuit was not as effective, which is most likely the primary reason, further, and somewhat counter-intuitive, the average voltage fluctuation (1000 cycles) was not found to be higher. It continued according to the same linear relationship, leaving short-circuiting voltage more stable.
