

## Congruent Triangles

### Lesson Synopsis:

In this lesson, the concept of congruence is extended to triangles. Congruent triangles are explored both from the standpoint of congruence transformations and an axiomatic structure. Students justify congruent triangles with congruence transformations and prove triangles congruent with postulates and theorems. Students extend the concepts of congruent triangles to prove further characteristics of triangles using corresponding parts of congruent triangles, CPCTC.

| G.2   | Geometric structures. The student analyzes geometric relationships in order to make and verify conjectures.                                                                                                                     |
| G.2B  | Make conjectures about angles, lines, polygons, circles, and three-dimensional figures and determine the validity of the conjectures, choosing from a variety of approaches such as coordinate, transformational, or axiomatic. |
| G.3   | Geometric structures. The student applies logical reasoning to justify and prove mathematical statements.                                                                                                                       |
| G.3B  | Conclude and justify statements about geometric figures and their properties.                                                                                                                                                   |
| G.3C  | Use logical reasoning to prove statements are true and find counter-examples to disprove statements that are false.                                                                                                             |
| G.7   | Dimensionality and the geometry of location. The student understands that coordinate systems provide convenient and efficient ways of representing geometric figures and using them accordingly.                                |
| G.7A  | Use one- and two-dimensional coordinate systems to represent points, lines, rays, line segments, and figures.                                                                                                                   |
| G.1B  | Congruence and the geometry of size. The student applies the concept of congruence to justify properties of figures and solve problems.                                                                                         |
| G.1BA | Use congruence transformations to make conjectures and justify properties of geometric figures including figures represented on a coordinate plane.                                                                             |
| G.1BB | Justify and apply triangle congruence relationships.                                                                                                                                                                            |
