

HORSEPOWER & WORKPOWER

The right ratio of power, weight, and strength is needed to make horsepower work for you. To make sure that one of the world's finest engines wouldn't be part of a mediocre tractor, the designers gave careful consideration to weight, balance and power transmission. They matched weight to horsepower in each model, to give good traction for field work. They made sure that the balance of weight was right for the Ford system of mounted equipment. And they added strength in the axles and chassis to meet the needs of today's fast, more productive farming.

Transmissions, to meet every need were developed to deliver power efficiently to drawbar and to PTO.

Power-shift with Select-O-Speed. Favored by many thousands of Ford owners as today's most advanced tractor transmission . . . with reliability

proved by 60 million field hours . . . Select-O-Speed was further reexamined. The result: triple-range design for even smoother on-the-go shifting, particularly between the gears most often used for heavy pulling, for the normal field work range, and for the road or transport range. And, with Select-O-Speed, Ford continues to offer on-the-go hydraulic control of its completely independent PTO. Available for all new-size Fords except the 2000.

Dual-range, 8-speed transmission. Extra rugged, designed to minimize shifting between high and low ranges. Available with independent PTO for 4000 and 5000 tractors and with live or transmission-type PTO for the 3000.

Low-cost 4-speed transmission with transmission-type PTO is regularly furnished with 2000 and 3000 tractors.
