7. Organisms that have two identical alleles for a particular trait are said to be **homozygous**.
8. In a cross between Tt x TT, what is the phenotypes of the offspring? **All are expected to be tall.**
9. What principle states that during gamete formation genes for different traits separate without influencing each other's inheritance? **Principle of Independent Assortment**
10. Situations in which one allele for a gene is not completely dominant over another allele for that gene are called **incomplete dominance**.
11. A cross of a woman with type A blood and a man with type B blood produces a child with type AB blood. This type of inheritance is known as **codominance**.
12. If an organism's diploid number is 12, its haploid number is **6**.
