Alternative Tourism in Turkey Istvan Egresi, 2016-12-08 This book takes inventory of and evaluates the available resources for the development of alternative tourism in Turkey It examines the role of alternative tourism in future tourism development plans and proposes public policies necessary to assure sustainability Although tourism started later in Turkey than in the Western Mediterranean countries it has grown very rapidly during the last three decades and today the country ranks among the top ten countries in the world in terms of both arrivals and receipts However most of the tourism development has been in the mass tourism

sector or the so called sun sea sand tourism While crucial for the economic development of Turkey mass tourism in the absence of proper planning has happened in a haphazard manner leading to numerous environmental and socio cultural problems This book argues that in order to mitigate these problems Turkey should encourage the development of alternative forms of tourism

Delang,Yi Hang Yu,2015-06-26 Dissatisfaction with the Gross Domestic Product GDP as an indicator of a country s

development or a population's wellbeing led to the development of the Genuine Progress Indicator (GPI). The GPI is an aggregate index of over 20 economic, social, and environmental indicators and accounts for both the welfare benefits of economic growth and the social and environmental costs which accompany that economic growth. The result is better information about the level of welfare or well-being of a country's population. This book measures the GPI of Hong Kong and Singapore from 1968 to 2010. It finds that for both countries economic output as measured by the GDP has grown more than welfare as measured by the GPI, but important differences are also found. In Hong Kong, the GPI has grown for the whole period under consideration, while in Singapore the GPI has stalled from 1993. This is in line with most countries and is explained by the threshold hypothesis, which states that beyond a certain level of economic development, the benefits of further economic growth are outweighed by even higher environmental and social costs. The book argues that the growth of Hong Kong's GPI is due to its favourable relationship with China and, in particular, its ability to export low wage jobs and polluting industries rather than successful domestic policies. A stalling or shrinking GPI calls for alternative policies than the growth economy promoted by neoclassical economists, and the book explores an alternative model, that of the Steady State Economy (SSE).

Impact of Organized Crime on Murder of Law Enforcement Personnel at the U.S.-Mexican Border

Sara Schatz, 2014-07-14. This brief fills a gap in the studies of organized crime in Mexico. Kan, 2012. Ros, 2011. Dell, 2011. By documenting and mapping the post-2008 assassination of Mexican border police chiefs, it traces out a systematic of law enforcement assassination in Northern Tier Mexico, showing how the selective, often sequential hits by cartels on chiefs in border towns and along key drug trafficking corridors have proven an effective strategy by organized crime elements to serve several goals: 1) to retaliate for federal state and local prosecution; 2) to try and neutralize police chiefs; 3) to achieve intermittent local governance; and/or 4) to seed corrupt police chiefs at the municipal level and 4) to reduce local governmental capacity to obtain greater freedom for movement of goods. It is argued that the tactical advantage of organized crime elements gives them relatively easy physical access to law enforcement targets, and thus is thus one prime element facilitating the use of assassination as a strategy. U.S. and Mexican legal, political, and judicial institutions have not been able to adequately restrict opportunity for law enforcement assassinations. The inability to reduce access to weapons and officials to increase security for police personnel to reduce corruption and punish offenders sets the stage for the assassination of local law enforcement. Yet it is the goals of organized crime elements to clear drug smuggling routes and to try and gain more pliant governance at the municipal level that ultimately motivate such killings.

Planning for an innovation district

Sara Lawrence, Michael Hogan, Elizabeth Grace Brown, 2019-02-13. Innovation districts are physical spaces that serve to strengthen the foundations and institutions of an innovation ecosystem. The design, implementation, and management of formalized innovation districts is a new practice area.

Research draws upon the experience of concentrated areas of innovation that occurred organically such as Boston's Route 128 as well as intentional projects to bring together innovators in large science and technology parks such as North Carolina's Research Triangle Park Existing research focuses on how to define and design innovation districts and evaluate their impact as well as general policy considerations In this paper we review the definitions and benefits of an innovation district reviewing the existing empirical research on their impacts We then propose a series of questions to guide practitioners in addressing the economic physical social and governance elements of an innovation district Finally we outline some of the challenges in creating an innovation district and ways to measure progress to allow practitioners to get ahead of potential issues in the future This paper is intended to help policymakers and practitioners working in innovation and economic development translate the concepts of innovation ecosystems into actionable next steps for planning innovation districts in their communities

Bringing Home the Housing Crisis Mel Nowicki, 2023-04-27 Often portrayed as an apolitical space this book demonstrates that home is in fact a highly political concept with a range of groups in society excluded from a right to home under current UK policies Drawing on resident interviews and analysis of political and media attitudes across three case studies the criminalisation of squatting the bedroom tax and family homelessness the book explores the ways in which legislative and policy changes dismantle people's rights to secure decent and affordable housing by framing them as undeserving
