Childhood Head Injury Maureen Dennis,Harvey S. Levin,2016-03-23 Childhood head injuries differ from adult head injuries in some significant respects They occur against a background of ongoing physical and cognitive development Cognitive capacities often change with time post injury But for children changes are affected by two processes of functional plasticity one concerned with recovery one with development The impact of the injury is moderated by age developmental stage In recent years there has been a new focus on the longitudinal comparison of children post injury with appropriate control groups Advances in neuropsychological assessment have permitted evaluation with reference to more developmentally suitable norms expanded definitions of outcome have broadened our understanding of consequences and neuroimaging techniques have enabled the more precise delineation of injury severity the study of structure function outcome relations and the investigation of reorganization of function This special issue offers an overview of cutting edge approaches to the analysis of childhood head injury

Autism: The Movement (Sensing) Perspective a Decade Later Elizabeth B. Torres,Jonathan T. Delafield-Butt,Vikram K. Jaswal,Susan Crawford,Ashok Srinivasan,Brittany Travers,2025-08-19 A decade ago in 2013 the Research Topic Autism the Movement Perspective proposed the radical idea that using movement and its sensations could help us better understand the many complex layers of autism spectrum disorders Inspired by earlier work from other fields the work positioned front and center approaches from neuromotor control infusing the research with new computational ideas to study autism across the human lifespan Through the lens of motor variability as a form of kinesthetic reafference causal inference and predictive codes the Research Topic brought together a group of researchers parents practitioners and self advocates to rethink autism as sensory motor differences contributing to the emergence of powerful coping mechanisms that advanced our understanding of how the human brain develops and functions Today with new improvements in biosensing technologies and neuroscience and the embodied and affective psychology on which development is based we revisit this Research Topic approaching autism anew through a modernized lens of precision aimed at enabling socio motor agency

A Guide to Clinical Assessment and Professional Report Writing in Speech-Language Pathology Renee Fabus,2024-06-01 Learning to assess speech and language

disorders and write diagnostic reports may be an overwhelming experience especially when most texts don't cover both topics at once. With that in mind, *A Guide to Clinical Assessment and Professional Report Writing in Speech Language Pathology* Second Edition combines the latest assessment protocols and diagnostic techniques with vital diagnostic report writing tools into a single definitive guide. Cyndi Stein, Rubin, Renee Fabus, and their contributors recognize that clinical assessment is inextricably linked to report writing and have updated this Second Edition to synthesize the two. Following the introductory chapters which discuss the basics of assessment and report writing, each subsequent chapter focuses on a particular disorder, provides in-depth assessment tools, and presents a corresponding sample report. Key Features: An inventory and explanation of formal and informal assessment measures; A glossary of key vocabulary; Sample case histories with assessment tools; Relevant and useful interview questions; Each disorder's background and characteristics; Assessment parameters; A differential diagnosis section; A model report. The accessible format of *A Guide to Clinical Assessment and Professional Report Writing in Speech Language Pathology* Second Edition will help students learn how to assess and document speech and language disorders and will also make for a perfect reference for them as clinicians for years to come.
