Abstract—This research aimed to identify and study international benchmark service sequences for housekeeping room attendance and also investigated the housekeeping service quality via the gaps between guest expectation and actual perceived satisfaction. The objective of this research was to develop housekeeping room attendance human resources and increase the competitive advantage of Thai graduates so that they would be able to effectively work across the ASEAN Economic Community (AEC).

The conceptual framework is the study of housekeeping service quality based on five dimensions of SERVQUAL framework. Mixed methodology was used in this study. First, a qualitative study of standard housekeeping room attendance service sequences via the in-depth interview with professional housekeepers from Four Seasons Resort and Hotel Chiangmai, Banyan Tree Phuket and the Siam Kempinski Bangkok cooperated. Second, the quantitative study of gaps between satisfaction and the expectation on housekeeping service quality. Using 250 bi-lingual questionnaires to collect the data from non-probability samples, living in the hotels mentioned above. Mean and standard deviation were used to rank and compare each dimension of service quality. ANOVA inferential statistic was used to analyze guest expectation score according to different aims of stays.

From professional point of view, the housekeeping room attendance standard service sequences (RSSS) were discussed and concluded into ten logical steps. These steps of room attendant's service sequences were then proven successful with high satisfactory ratings by the clients. The statistic result demonstrated that group business have average score on overall expectation less than others, they paid more attention into the tangible dimension. The expectation scores on each dimension a little bit higher than real perceived satisfaction. The customers rate the most importance service as housekeeping assurances, then housekeeping reliabilities, tangibility, empathy and responsiveness, (in decreasing order) This is can be seen as a gap and an opportunity for growth in housekeeping human resources.
