Sencar, Sergio Velastin, Nikolaos Nikolaidis, Shiguo Lian, 2010-04-03 The advances in the generation and processing of multimedia data e g documents images video audio animations etc have had an immense impact on multimedia applications and as a result multimedia has permeated almost every aspect of our daily lives This development has also brought with it a whole host of issues and challenges which were either not as apparent before or were non-existent Today digital media is relied upon as primary news and information resource as evidence in a court of law as part of medical records or as financial documents However there is still lack of authoritative mechanisms to verify the origin and veracity of media data Indeed multimedia content has become an extremely valuable asset and it is being both disseminated and consumed on a larger scale than ever before but the issues concerning how the content owners and publishers should control the distribution of and access to their content have not been satisfactorily resolved yet There are various other issues related to use of multimedia that require further analysis and research For example it is a known fact that some criminal organizations communicate with its members by posting

information embedded media to public forums and web sites to evade surveillance by law enforcement Conventional multimedia processing approaches do not provide sufficiently effective means for fending against such communication
