Hyper-Productive Knowledge Work Performance Steve Tendon, Wolfram Muller, 2014-12-16 Reading Hyper Productive Knowledge Work Performance has influenced my thinking more than any other recent book I have read about how to transform my company s culture to achieve higher levels of productivity It s like the perfect mix of Fred Brooks W Edwards Deming Donald Reinertsen David Anderson and Jeff Sutherland all rolled into one approachable and pragmatic book I recognized a lot of what I already knew and then was pleasantly surprised with how the authors used hyper productivity to show how it all interconnected All in all it is an eye opening book that provides a concrete path to hyper productivity

Curt Hibbs Chief Agile Evangelist Boeing This unique reference shows how to lead knowledge workers manage knowledge work and build a hyper productive knowledge work organization by taming and managing the four flows of organizational performance psychology information work and finance to produce spectacular operational and financial throughput results Inspired by his experience and knowledge gained at Borland International where a hyper productive level of performance was achieved resulting in the most productive software project ever documented author Steve Tendon devised TameFlow TameFlow is an approach that can be superimposed on any preexisting process method and practice to enable performance improvement by several orders of magnitude and a state of hyper productivity It is adaptable to nearly every industry and can be applied to any knowledge work domain or organization that generates business value through knowledge TameFlow blends and merges different ideas from a variety of schools of thought It is founded in pattern theory and organizational performance patterns which are used to analyze and decompose processes methodologies and management practices into constituent parts to observe productivity patterns and then they are recombined in new configurations to enable hyper productive levels of performance

In this volume of The TameFlow Hyper Productivity Series the TameFlow approach is explained within the context of knowledge work performed in a software development organization Mr Tendon teams up with author Wolfram Muller a thought leader and expert in Critical Chain and Advanced Agile Project Management to illustrate its application to Scrum the most widely used Agile software project management framework and to Kanban a method used for knowledge work with an emphasis on just in time delivery and change
