

IELTS Writing Task 1: pie charts essay

Here's my full essay for the [3 pie charts](#) question that we've been looking at over the last two weeks:

The pie charts compare the expenditure of a school in the UK in three different years over a 20-year period.

It is clear that teachers' salaries made up the largest proportion of the school's spending in all three years (1981, 1991 and 2001). By contrast, insurance was the smallest cost in each year.

In 1981, 40% of the school's budget went on teachers' salaries. This figure rose to 50% in 1991, but fell again by 5% in 2001. The proportion of spending on other workers' wages fell steadily over the 20-year period, from 28% of the budget in 1981 to only 15% in 2001.

Expenditure on insurance stood at only 2% of the total in 1981, but reached 8% in 2001. Finally, the percentages for resources and furniture/equipment fluctuated. The figure for resources was highest in 1991, at 20%, and the proportion of spending on furniture and equipment reached its peak in 2001, at 23%.

(158 words, band 9)

The table below shows changes in the numbers of residents cycling to work in different areas of the UK between 2001 and 2011.

The table compares the numbers of people who cycled to work in twelve areas of the UK in the years 2001 and 2011.

Overall, the number of UK commuters who travelled to work by bicycle rose considerably over the 10-year period. Inner London had by far the highest number of cycling commuters in both years.

In 2001, well over 43 thousand residents of inner London commuted by bicycle, and this figure rose to more than 106 thousand in 2011, an increase of 144%. By contrast, although outer London had the second highest number of cycling commuters in each year, the percentage change, at only 45%, was the lowest of the twelve areas shown in the table.

Brighton and Hove saw the second biggest increase (109%) in the number of residents cycling to work, but Bristol was the UK's second city in terms of total numbers of cycling
