PRIME FEB MAR 2013 ,2013-02-01 **The Business of Healthcare Innovation** Lawton Robert Burns,2020-03-12

The tech sectors are the least understood portion of the healthcare system but the ones that supply most of the innovation in healthcare services and generate most revenue Fully updated for this third edition The Business of Healthcare Innovation is a wide ranging analysis of business models and trends in the tech sectors of the healthcare industry It provides a thorough overview of and introduction to the innovative sectors that fuel improvements in healthcare pharmaceuticals biotechnology life science startups medical devices and information technology For each sector the book examines the trends in scientific innovation the science behind that innovation the business and revenue models pursued to commercialize that innovation the regulatory constraints within which each sector must operate and the growing issues posed by activist payers and consumers From a combination of academic and industry perspectives the authors show why healthcare sectors are such an important source of growth in any nation s economy

Laboratory Dogs Rescued Ellie Hansen,2021-12-09 Animal testing is a controversy that has raged for hundreds of years Some people view experiments on dogs as necessary for human medical progress while others argue that the practice is barbaric When the author adopted Marty a beagle rescued from a research laboratory she found herself rehabilitating a terrified dog with a traumatic past She soon discovered the well kept secret of painful and often fatal testing on dogs This book details what the author has learned about the past and present of laboratory testing on dogs life after laboratories and the hope for a future without animal testing Interviews with rescue organizers and adoptive families reveal the struggles of removing dogs from laboratories and acclimating them to daily life Scientists discuss the ethics of dog research and advocate for new biomedical technologies Fundamental change is brewing with the public scientists and governments urging the use of new technologies that can replace testing on animals and yield better results

Reconfiguration of the Global South Eckart Woertz,2016-10-04 Since the 1980s there has been a steady shift from West to East in the international system economically politically and culturally Emerging markets in Asia have moved up the value chain of industrial production processes while the share of Western industrialized countries in global gross domestic product has declined Countries such as China and India are asserting themselves in security matters and seeking new avenues for investment flows and development co operation China s expected shift from export led growth to domestic consumption might further change patterns of trade and capital flows and it is an open debate whether the growth dynamics of India might outstrip those of China While the rise of China and other Asian powers has been studied extensively much less work has been done on how Africa and Latin America position themselves in this process What will the role be of Africa and Latin America in the Asian Century and associated reconfigurations of global value chains Will these regions be able to assert themselves and find a voice of their own Will they manage to develop industries of their own and diversify trade relations Will they launch new ways of regional south south co operation What is the role of migrant communities and cultural exchange Do

Western and Asian approaches to these regions differ Washington vs Beijing consensus This book brings together renowned academics from Africa Latin America Europe and the USA who bring refreshing perspectives on an under researched topic ranging from a conceptualization of the issue within new theoretical approaches to unique case studies based on field work

Engaging the Age of Jane Austen Bridget Draxler, Danielle Spratt, 2019-01-03 Humanities scholars in general often have a difficult time explaining to others why their work matters and eighteenth century literary scholars are certainly no exception To help remedy this problem literary scholars Bridget Draxler and Danielle Spratt offer this collection of essays to defend the field s relevance and demonstrate its ability to help us better understand current events from the proliferation of media to ongoing social justice battles The result is a book that offers a range of approaches to engaging with undergraduates non professionals and broader publics into an appreciation of eighteenth century literature Essays draw on innovative projects ranging from a Jane Austen reading group held at the public library to students working with an archive to digitize an overlooked writer s novel Reminding us that the eighteenth century was an exhilarating age of lively political culture marked by the rise of libraries and museums the explosion of the press and other platforms for public intellectual debates Draxler and Spratt provide a book that will not only be useful to eighteenth century scholars but can also serve as a model for other periods as well This book will appeal to librarians archivists museum directors scholars and others interested in digital humanities in the public life Contributors Gabriela Almendarez Jessica Bybee Nora Chatchoomsai Gillian Dow Bridget Draxler Joan Gillespie Larisa Good Elizabeth K Goodhue Susan Celia Greenfield Liz Grumbach Kellen Hinrichsen Ellen Jarosz Hannah Jorgenson John C Keller Naz Keynejad Stephen Kutay Chuck Lewis Nicole Linton Devoney Looser Whitney Mannies Ai Miller Tiffany Ouellette Carol Parrish Paul Schuytema David Spadafora Danielle Spratt Anne McKee Stapleton Jessica Stewart Colleen Tripp Susan Twomey Nikki JD White Amy Weldon

The Capacity to Innovate Sarah Giest, 2021 In The Capacity to Innovate Sarah Giest provides insight into the collaborative and absorptive capacities needed to provide public support to local innovation through cluster organizations The book offers a detailed view of the vertical multi level and horizontal dynamics in clusters and cluster policy and addresses how they are managed and supported Using the biotechnology field as an example Giest highlights challenges in the collaborative efforts of public bodies private companies and research institutes to establish a successful eco system of innovation in this sector The book argues that cluster policy in collaboration with cluster organizations should focus on absorptive and collaborative capacity elements missing in the cluster context in order to improve performance Currently governments operate at different levels local to supranational in order to support clusters and cluster policies are often pursued in parallel to other programs As the book shows this can lead to uncoordinated efforts and ineffective cluster strategies Relational dynamics are often overlooked when working backwards from performance indicators since their effects are largely indirect but Giest demonstrates that both the cluster organization and the cluster eco system play a role The Capacity to Innovate advocates for a coordinated effort by

government and cluster organizations to support capacity elements lacking within the specific cluster context **Mendel's Ark** Amy Lynn Fletcher, 2014-09-19 Does extinction have to be forever As the global extinction crisis accelerates conservationists and policy makers increasingly use advanced biotechnologies such as reproductive cloning polymerase chain reaction PCR and bioinformatics in the urgent effort to save species Mendel's Ark considers the ethical cultural and social implications of using these tools for wildlife conservation Drawing upon sources ranging from science to science fiction it focuses on the stories we tell about extinction and the meanings we ascribe to nature and technology The use of biotechnology in conservation is redrawing the boundaries between animals and machines nature and artifacts and life and death The new rhetoric and practice of de extinction will thus have significant repercussions for wilderness and for society The degree to which we engage collectively with both the prosaic and the fantastic aspects of biotechnological conservation will shape the boundaries and ethics of our desire to restore lost worlds Routledge Handbook of Medical Law and Ethics Yann Joly, Bartha Maria Knoppers, 2014-09-19 This book explores the scope application and role of medical law regulatory norms and ethics and addresses key challenges introduced by contemporary advances in biomedical research and healthcare While mindful of national developments the handbook supports a global perspective in its approach to medical law Contributors include leading scholars in both medical law and ethics who have developed specially commissioned pieces in order to present a critical overview and analysis of the current state of medical law and ethics Each chapter offers comprehensive coverage of longstanding and traditional topics in medical law and ethics and provides dynamic insights into contemporary and emerging issues in this heavily debated field Topics covered include Bioethics health and human rights Medical liability Law and emerging health technologies Public health law Personalized medicine The law and ethics of access to medicines in developing countries Medical research in the genome era Emerging legal and ethical issues in reproductive technologies This advanced level reference work will prove invaluable to legal practitioners scholars students and researchers in the disciplines of law medicine genetics dentistry theology and medical ethics *Wildcraft* Heidi Merika, IntegralDMS, 2019-10-14 Wildcraft is a beautifully illustrated comprehensive and practical guide to using wild plants as food and medicine It covers everything from the energetic spirit qualities of the plants to botanical identification nutritional profiles chemical constituents folk medicine how the plants are used cautions and contraindication and some of the most extensive research on the topic of wild plants as food and medicine to date Wildcraft gives you the ability to confidently identify wild edible and medicinal plants out in the field For the home gardener this opens up a whole new world of wonder and appreciation for the weeds in your garden as well as wonderful new ways to use them as food and medicine This book provides practitioners of herbal medicine with a strong evidence base to justify the use of these plants in their practice as well as providing students and researchers with an evidenced based foundation on which to conduct further studies in this area *REDD+ Crossroads Post Paris: Politics, Lessons and Interplays* Esteve Corbera , Heike

Learning Marketplace, The: East Meets West In Singapore Prem Kumar,2015-09-23 In Asia we are witnessing an era where the pendulum of power seems to be swaying towards the East with the rising strength of China and India and Singapore is at the crossroads between these populous nations Although Singapore may appear to be the most westernized country in Asia she is nevertheless a multi cultural Asian society Having the most open economy in the world Singapore is plugged into the global marketplace of education and learning The development of human capital is used as a strategic economic driver to internationalize and transform education for sustainable competitive advantage Singapore s education system regarded as one of the consistently best performing in the world offers a unique opportunity to explore issues where eastern and western culture values beliefs learning and knowledge systems converge clash and at times diverge This book is meant to extend our knowledge on the role of learning often overlooked and taken for granted as the air that we breathe but which constantly transforms our lives and reshapes societies It is the first book that deals with the dichotomy of east and west going beyond the traditional learning and education framework to other areas such as economic socio cultural political and technological dimensions that impact Singapore It puts together key topical issues and explores the underbelly of how a small resourceless independent city state like Singapore stays ahead of the learning curve even while facing increasingly intense global competition where the discovery and emergence of new systems for empowerment and independence and the resulting creation of new knowledge and modes of communication are challenging traditional boundaries between the virtual and real world **Barcoding Nature** Claire Waterton,2017-07-05 DNA Barcoding has been promoted since 2003 as a new

fast digital genomics based means of identifying natural species based on the idea that a small standard fragment of any organism's genome, a so-called micro genome, can faithfully identify and help to classify every species on the planet. The fear that species are becoming extinct before they have ever been known fuels barcoders and the speed, scope, economy and user-friendliness claimed for DNA barcoding as part of the larger ferment around the genomics revolution has also encouraged promises that it could inspire humanity to reverse its biodiversity-destructive habits. This book is based on six years of ethnographic research on changing practices in the identification and classification of natural species. Informed both by Science and Technology Studies (STS) and the anthropology of science, the authors analyse DNA barcoding in the context of a sense of crisis concerning global biodiversity loss but also the felt inadequacy of taxonomic science to address such loss. The authors chart the specific changes that this innovation is propelling in the collecting, organizing, analyzing and archiving of biological specimens and biodiversity data. As they do so, they highlight the many questions, ambiguities and contradictions that accompany the quest to create a genomics-based environmental technoscience dedicated to biodiversity protection. They ask what it might mean to recognise ambiguity, contradiction and excess more publicly as a constitutive part of this and other genomic technosciences. *Barcoding Nature* will be of interest to students and scholars of sociology of science, science and technology studies, politics of the environment, genomics and post-genomics philosophy and history of biology and the anthropology of science.

Profitability, Productivity, and Sustainability Dennis Onyama, 2021-06-17. This book presents an in-depth study of how the drive to optimize organizational performance can be significantly improved by investigating the causal relationships between profitability, productivity and sustainability (PPS). This is presented through an assessment of a triple combined therapy that studies the interplay between Organizational DNA, Strategic Alignments for Value and their implications for Sustainability. Through this approach, this volume seeks to answer critical mind-searching questions and provide useful guides as to how some firms are able to sustainably create higher value or wealth, especially through corporate entrepreneurship or via the creation of new business models than others. In tackling the three elements of profitability, productivity and sustainability, this book also provides greater insight through an in-depth study of the pervasively unresolved and disturbing issues surrounding the prospects of increasing the chances of success for entrepreneurial start-off ventures, making it of value to researchers, academics and students in the fields of organizational studies, strategy and sustainability.
