

CHILDREN'S ADMINISTRATION
DIVISION OF CHILDREN AND FAMILY SERVICES

LIFE SKILLS INVENTORY
INDEPENDENT LIVING SKILLS ASSESSMENT TOOL

INSTRUCTIONS

In order to accurately complete the IL assessment, please involve the youth, the Children's Administration social worker, the foster parent or relative caregiver, and any other persons knowledgeable about the skills of the youth.

☞☞ Scoring should be based on the lowest level of completion.

The level of attainment for each youth completing this assessment is the lowest level where they satisfactorily complete the required number of questions. Youth may be highly competent in some areas, but have limited basic knowledge in others. Having basic knowledge in each area is important for long term success, and plan development should be focused on filling gaps in youth knowledge.

☞☞ Completing Category O

It is important for all youth to have a basic knowledge of options for pregnancy prevention. It is not the goal for all youth to reach "Exceptional" in this category, unless the youth (either male or female) is or will shortly be in a parenting role. Abuse and neglect issues are not specifically assessed, but competence at the "intermediate" level should help youth avoid CPS complaints.

☞☞ Time frames for completion

All youth should be assessed at age 15 to 16. Once you have completed the IL assessment on a youth you do not need to repeat the assessment. All further reporting will be based on the goals of the youth, and their skill level will be indicated by the progress achieved in attaining goals. If the youth remains on the same goal, the skill level doesn't change.

Harrison,2011-10-10 Adaptive Behavior Assessment System II summarizes information on adaptive behavior and skills as well as general issues in adaptive behavior assessment with the goal of promoting sound assessment practice during uses interpretations and applications of the Adaptive Behavior Assessment System II Adaptive behavior and skills refer to personal qualities associated with the ability to meet one s personal needs such as communication self care socialization etc and those of others Data from measures of adaptive

behavior have been used most commonly in assessment and intervention services for persons with mental retardation. However, the display of adaptive behaviors and skills is relevant to all persons. The Adaptive Behavior Assessment System II (ABAS II) provides a comprehensive norm-referenced assessment of the adaptive behavior and skills of individuals from birth through age 89. The comprehensive nature of the ABAS II ease in administration and scoring and wide age range have resulted in its widespread use for a large number of assessment purposes. The book provides practical information and thus serves as a valuable resource for those who use the ABAS II. Assists in the functional use of the ABAS II. Provides case studies illustrating use of the ABAS II in comprehensive assessment and intervention planning. Reviews scholarship on adaptive behaviors and skills. Describes legal, ethical, and other professional standards and guidelines that apply to the use of the ABAS II and other measures of adaptive behavior. Discusses the use of the ABAS II with autism, mental retardation, young children, and those in elementary and secondary school, as well as incarcerated persons being evaluated for possible mental retardation.
