ICCSM2014-Proceedings of the International Conference on Cloud Security Management ICCSM-2014 Barbara Endicott-Popovsky, 2014-10-07 These Proceedings are the work of researchers contributing to the 2nd International Conference on Cloud Security Management Security ICCSM 2014 being held this year at the University of Reading UK on the 23 24 October 2014 The conference chair is Dr John McCarthy Vice President from the Cyber Security Service Tech UK and the Programme Chair is Dr Barbara Endicott Popovsky from the Center for Information Assurance and Cybersecurity University of Washington Seattle USA As organisations rush to adopt Cloud Computing at a rate faster than originally projected it is safe to predict that over the coming years Cloud Computing will have major impacts not only on the way we conduct science and research but also on the quality of our daily human lives Computation research education and business communities have been exploring the potential benefits of Cloud Computing and the changes these imply Experts have predicted that the move to the cloud will alter significantly the content of IT jobs with cloud clients needing fewer hands on skills and more skills that administer and manage information Bill Gates was recently quoted How you gather manage and use information will determine whether you win or lose Cloud Computing impacts will be broad and pervasive applying to public and private institutions alike *Principles of Clinical Medicine for Space Flight* Michael R. Barratt, Ellen S. Baker, Sam L. Pool, 2020-01-02 In its first edition *Principles of Clinical Medicine for Space Flight* established itself as the authoritative reference on the contemporary knowledge base of space medicine and standards of care for space flyers It received excellent notices and is used in the curricula of civilian and military training programs and used as a source of questions for the Aerospace Medicine Certifying Examination under the American Board of Preventive Medicine In the intervening few years the continuous manning of the International Space Station has both strengthened existing knowledge and uncovered new and significant phenomena related to the human in space The Second Edition incorporates this information Gaps in the first edition will be addressed with the addition new and revised chapters This edition is extensively peer reviewed and represents the most up to date knowledge *Africa's Lions* Haroon Bhorat, Finn Tarp, 2016-11-08 Examining the economic forces that will shape Africa's future *Africa's Lions* examines the economic growth experiences of six fast growing and or economically dominant African countries Expert African researchers offer unique perspectives into the challenges and issues in Ethiopia Ghana Kenya Mozambique Nigeria and South Africa Despite a growing body of research on African economies very little has focused on the relationship between economic growth and employment outcomes at the detailed country level A lack of empirical data has deprived policymakers of a robust evidence base on which to make informed decisions By harnessing country level household firm and national accounts data together with existing analytical country research the authors have attempted to bridge this gap The growth of the global working age population to 2030 will be driven primarily by Africa which means that the relationship between growth and employment should be

understood within the context of each country's projected demographic challenge and the associated implications for employment growth. A better understanding of the structure of each country's workforce and the resulting implications for human capital development, the vulnerably employed and the working poor will be critical to informing the development policy agenda. As a group, the six countries profiled in Africa's Lions will largely shape the continent's future. Each country chapter focuses on the complex interactions between economic growth and employment outcomes within the individual Africa's Lions context.

Bridging the Theory-Practice Divide in International Relations Daniel Maliniak, Susan Peterson, Ryan Powers, Michael J. Tierney, 2020-05-01. There is a widening divide between the data tools and knowledge that international relations scholars produce and what policy practitioners find relevant for their work. In this first of its kind conversation, leading academics and practitioners reflect on the nature and size of the theory-practice divide. They find the gap varies by issue area and over time. The essays in this volume use data gathered by the Teaching Research and International Policy (TRIP) Project over a fifteen-year period. As a whole, the volume analyzes the structural factors that affect the academy's ability to influence policy across issue areas and the professional incentives that affect scholars' willingness to attempt to do so. Individual chapters explore these questions in the areas of trade, finance, human rights, development, environment, nuclear weapons, and strategy, interstate war, and intrastate conflict. Each substantive chapter is followed by a response from a policy practitioner providing their perspective on the gap and the possibility for academic work to have an impact. **Bridging the Theory-Practice Divide in International Relations** provides concrete answers and guidance about how and when scholarship can be policy relevant.

The Continuing Imperialism of Free Trade Jo Grady, Chris Grocott, 2018-10-08. In 1953 John Gallagher and Ronald Robinson shook the foundations of imperial history with their essay *The Imperialism of Free Trade*. They reshaped how historians saw the British empire, focussing not on the red bits on the map and the wishes of policy makers in London but rather on British economic and political influence globally. Expanding on this analysis, this volume provides an examination of imperialism which brings the reader right up to the present. This book offers an innovative assessment and analysis of the history and contemporary status of imperial control. It does so in four parts: examining the historical emergence and traditions of imperialism; the relationships between the periphery and the metropolitan; the role of supranational agencies in the extension of imperial control; and how these connect to financialisation and international political economy. The book provides a dynamic and unique perspective on imperialism by bringing together a range of contributors, both established and up-and-coming scholars, activists, and those from industry, from a wide range of disciplines and backgrounds. In providing these authors a space to apply their insights, this engaging volume sheds light on the practical implications of imperialism for the contemporary world. With a broad chronological and geographical sweep, this book provides theoretical and empirical engagements with the nature of imperialism and its effects upon societies. It will be of great interest to a broad range of disciplines across the humanities and social sciences, especially those working in History.

The Biological Weapons Taboo Michelle Bentley, 2023 The non use of biological weapons has been described as the great mystery of

biological warfare The Biological Weapons Taboo solves that mystery by analysing the bioweapons taboo in the first comprehensive study of the concept Bentley explains precisely why bioweapons are perceived as repulsive and how this sentiment is consequently expressed in the form of political behaviours including the refusal to engage in biological aggression Drawing on extensive archival evidence this volume looks back on United States foreign policy decision making particularly in relation to the Geneva Protocol and the Biological Weapons Convention to demonstrate how and why the taboo has comprised a decisive factor in shaping both biowarfare strategy and political rhetoric and why the taboo needs to be recognised as a necessary consideration in the study of bioweapons In analysing a taboo the volume also takes the debate on international norms forward by questioning and challenging the wider analytic comprehension of taboo itself Rejecting current definitions of the concept as inadequate Bentley proposes a new and original model of understanding based on the normative characteristics of disgust stigmatization and fetishization

The Rhetorical Invention of America's National Security State Marouf Hasian Jr., Sean Lawson, Megan D. McFarlane, 2015-07-29 The Rhetorical Invention of America's National Security State examines the rhetoric and discourse produced by and constitutive of America's national security state Hasian Lawson and McFarlane illustrate the importance of rhetoric to the expansion of the American national security state in the post 9 11 era through their examination of the global war on terrorism enhanced interrogation techniques drone crew stress activities of Edward Snowden rise of Special Forces and popular representations of counterterrorism The coauthors contend this expansion was not the result of lone imperial executives or a nefarious state within a state but was co produced by elite and non elite Americans alike who not only condoned but also in many cases demanded the expansion of the national security state This work will be of interest to scholars in communication studies and political science

Girl Power? Sarah Bellows-Blakely, 2025-05-06 An examination of how when and why austerity capitalism and strands of feminism became intertwined and why girl-focused programs have been at the heart of international policymaking Girl-focused education programs have long been at the heart of international policymaking when girls' access to education is ensured the reasoning goes they are more likely to turn into productive adults who can drive economic growth These ideas combine strands of feminism and capitalism that have a specific and understudied origin In this book historian Sarah Bellows-Blakely shows how a doctored study of girls' education in East and Southern Africa led to the creation of international norms in the United Nations that would go on to guide policymaking on women's rights and economic growth promoting neoliberal feminist policy at the expense of other forms of gender-based justice Focusing on the growth of free market feminism and girl-focused economic development planning through the relationship between UNICEF and the Nairobi-based NGO FEMNET Bellows-Blakely reveals how their joint efforts set the blueprints for linked movements of economic development and women's rights that are still ongoing Through a

narrative of the UNICEF FEMNET lobbying campaign Bellows Blakely shows how multiple contested girl focused visions of economic programming and gender justice became selectively erased in favor of an approach to global policy centered on the free market construction and strategic deployment of the African girl child Flourishing in the Early Years Zenna Kingdon, Jan Gourd, Michael Gasper, 2016-12-08 If young children are to flourish and become happy confident and motivated learners they need to develop in an environment that gives them the opportunities and freedom to play and learn along with the support of parents and practitioners who are flourishing themselves This invaluable text looks at the conditions that enable all those engaged in the early years sector to flourish covering themes such as the outdoor environment the curriculum parent partnership equality and ethical practice Divided into three sections each part covers Concepts A consideration of how flourishing is framed by political historical and policy frameworks Practices Exploring the issues that early years practitioners are faced with when engaging with parents and multi agent professionals within their setting Futures Examining some of the long term issues that may need to be revisited on a regular basis to enable continual and flourishing development to occur With key points and reflective tasks this book will be valuable reading to all students and practitioners working in the early childhood education and care sector who want to ensure that the children in their care are given the best possible start in life Assured Destruction David Bath, 2020-03-15 Assured Destruction Building the Ballistic Missile Culture of the U S Air Force documents the rapid development of nuclear ballistic missiles in the United States and their equally swift demise after the Cuban Missile Crisis revealing how these drastic changes negatively influenced both the Air Force and the missile community David W Bath contends that the struggle to create and control nuclear ballistic missiles threatened both the dominance of the United States during an intensifying Cold War and the strategic airpower mission of the newly created Air Force The book details the strenuous efforts required to create and prepare a missile arsenal before the Cuban Missile Crisis which occurred only five years after the first missile was declared operational It uses the personal recollections of former missileers and the professional military education theses they wrote to highlight some of the concerns that have faced the missileers who operated and worked on these powerful weapons from 1957 to the present The highlight of the book however is the personal stories of the missileers who served during the missile crisis revealing the efforts that they went to in order to prepare these unique and untried weapons for what many thought might become the third world war
