**Parks in Medieval England** S. A. Miles,2009-07-16 Parks were prominent and indeed controversial features of the medieval countryside but they have been unevenly studied and remain only partly understood Stephen Miles provides the first full length study of the subject examining parks across the country and throughout the Middle Ages in their full social economic jurisdictional and landscape context The first half of the book investigates the purpose of these royal and aristocratic reserves which have been variously claimed as hunting grounds economic assets landscape settings for residences and status symbols An emphasis on the aristocratic passion for the chase as the key motivation for park making provides an important challenge to more recent views and allows for a deeper appreciation of the connection between park making and the expression of power and lordship The second part of the volume examines the impact of park creation on wider society from the king and aristocracy to peasants and townsmen Instead of the traditional emphasis on the importance of royal regulation greater attention is paid to the effects of lordly park making on other members of the landed elite and ordinary people These widespread enclosures interfered with customary uses of woodland and waste hunting practices roads and farming not surprisingly they could become a focus for aristocratic feud popular protest and furtive resistance Combining historical archaeological and landscape evidence this ground breaking work provides fresh insight into contemporary values and how they helped to shape the medieval landscape

*Dialog Theory for Critical Argumentation* Douglas N. Walton,2007-09-19 Because of the need to devise systems for electronic communication on the internet multi agent computing is moving to a model of communication as a structured conversation between rational agents For example in multi agent systems an electronic agent searches around the internet and collects certain kinds of information by asking questions to other agents Such agents also reason with each other when they engage in negotiation and persuasion It is shown in this book that critical argumentation is best represented in this framework by the model of reasoned argument called a dialog in which two or more parties engage in a polite and orderly exchange with each other according to rules governed by conversation policies In

such dialog argumentation the two parties reason together by taking turns asking questions offering replies and offering reasons to support a claim They try to settle their disagreements by an orderly conversational exchange that is partly adversarial and partly collaborative A Cultural History of the Senses in the Middle Ages Richard G.

Newhauser, 2014-10-23 Understanding the senses is indispensable for comprehending the Middle Ages because both a theoretical and a practical involvement with the senses played a central role in the development of ideology and cultural practice in this period For the long medieval millennium the senses were not limited to the five we think of speech for example was categorized among the senses of the mouth And sight and hearing were not always the dominant senses for the medical profession taste was more decisive Nor were the senses only passive receptors they were understood to play an active role in the process of perception and were also a vital element in the formation of each individual's moral identity From the development of specifically urban or commercial sensations to the sensory regimes of holiness from the senses as indicators of social status revealed in food to the Scholastic analysis of perception this volume demonstrates the importance of sensory experience and its manifold interpretations in the Middle Ages A Cultural History of the Senses in the Middle Ages presents essays on the following topics the social life of the senses urban sensations the senses in the marketplace the senses in religion the senses in philosophy and science medicine and the senses the senses in literature art and the senses and sensory media
